

The device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: changes or modifications not expressly approved could void the user's authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful

interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined; by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

FCC Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

SPECIFICATIONS

Micro B Input: DC 5V, 2A DC 9V, 1.67A

Wireless Charging Output: 5W

Charging Efficiency: 70%

Transmission Distance: 3~8mm

Frequency: 111-205KHz

Wireless Charging Power: 10W

ProCharge™
POWER

FAST-CHARGE DESKTOP WIRELESS CHARGER

User Manual

With the ProCharge Fast-Charge Desktop Wireless Charger, you can charge the battery of your phone without connecting any cables to your phone.

PRODUCT AND SAFETY INFO

Handle your charger and accessories with care. The following suggestions will help you keep your device operational.

- Keep the charger away from high humidity. Do not get the charger wet. If your charger gets wet, let it dry before using.
- Use the charger for intended purposes only. Improper use, or use of incompatible chargers may present a risk of fire, explosion, or other hazard. Never use a damaged charger.
- Do not attempt to charge a device having a damaged, cracked or open battery case.
- Do not use or store the charger in dusty or dirty areas.
- Do not store the charger in extreme temperatures. High temperatures may damage the charger. Do not store the device in cold temperatures. When the device

warms to its normal temperature, moisture can form inside the device and damage it.

- Do not open the charger.
- Unauthorized modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the charger or the battery. Rough handling can break it.
- Do not place too close to a magnetic strip or chip card.
- To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 6 inches between a wireless device and the medical device.
- Only use a soft, clean, dry cloth to clean the surface of the charger.

COMPATIBILITY*

- iPhone® 8 and higher
- Galaxy®
- Android®

HOW TO CHARGE YOUR PHONE

Place your phone on the charging stand to start charging.

- Connect the USB cable of your charging stand to a suitable USB power source.
- Make sure the charger is in the standing position and there's nothing on the plate.
- Place your phone on the charging stand.

The following lights indicate:

<i>LED on for 2 seconds</i>	Unit power ON
<i>LED light on steady</i>	Charging
<i>LED light flashes</i>	Charging error, or the connected power source is not able to provide enough power
<i>LED lights green</i>	Full charge
<i>LED flashes from blue to green</i>	Device is not set properly onto stand or no device is recognized

It's normal for the charging plate and phone to get warm while charging. If there's a problem with the charging, the indicator light flashes quickly.

NOTE:

If your phone case is 5mm in depth, it would be better to take it off before charging. Thick cases will stop the charging unit from working.
