HMD (Dongle-Hub & Stem Stick)

View	Photo
Bottom	 A photograph showing the bottom view of a white, dome-shaped HMD. The underside of the helmet is visible, featuring several black rectangular sensor pads. A white stem stick is attached to the bottom center. Two black cables are connected to the device: one with a gold-plated connector and another with a different type of connector.
Top	 A photograph showing the top view of the white HMD. The front of the helmet is visible, showing the arrangement of black sensor pads. The white stem stick is positioned at the bottom. The two black cables are also visible, extending from the side of the helmet.
