

Internal Photos

HMD (Dongle-Hub)

View	Photo
Front (in case)	 A photograph showing the internal components of the HMD case. At the top, a blue battery is mounted. Below it, two green PCBs are visible, connected by a gold ribbon cable. The PCBs have various components and connectors. A black cable with two connectors is plugged into one of the PCBs. The case is white plastic with several screws visible.
Front (Beneath the Battery)	 A close-up photograph of the PCB located beneath the battery. The PCB is green and has a connector labeled 'J3' visible. It is mounted on a white plastic base with several screws.
