Attention: Application Examiner

RE: Family Certification Information
Applicant: Penumbra Inc.
FCC: 2AQU7-REAL02T

To Whom It May Concern:

REAL is a digital hardware and software medical device platform utilizing virtual reality technology designed for use in healthcare and focusing on physical, neurorehabilitation and/or wellness needs. REAL is offered in two configurations: REAL System and REAL System 2.

REAL System is intended to be used in a clinical environment, or any other facility that may facilitate rehabilitation by healthcare providers who have received appropriate training in rehabilitation therapy.

REAL System 2 is intended to be used in a residential environment, or any other facility that may facilitate rehabilitation individuals with physical, neurorehabilitation and/or wellness needs. A caregiver may be optionally present to help the user operate the system.

Both configurations use the same sensor modules listed under FCC: 2AQU7-REAL02T (HVIN: WTM2). Headset plastic, Sensor Charger, User Manual, and Label content differences between the two configurations is for home healthcare compliance purposes and does not alter the functionality between REAL System and REAL System 2.

Sincerely,
