

**GUIDE DE DÉMARRAGE RAPIDE**

**QUICK START GUIDE**

**Welcome aboard ! Bienvenue à bord !**

**1 Pour commencer !**

- Téléchargez et installez l'application sur votre smartphone.
- Ouvrez l'application et suivez les instructions à l'écran.
- Connectez-vous à un réseau Wi-Fi compatible.
- Vérifiez que votre appareil est correctement configuré.

**1 Get started !**

- Download the **GLBEE**™ app from the App Store or Google Play to your smartphone.
- Launch the **GLBEE**™ app.
- To get started, enter your mobile phone number or email address. Create a password, then log in to the app.
- Log in if you already have an account.

**2 Verify your network**

- Verify your network and ensure your mobile device is connected to a 2.4 GHz Wi-Fi channel.
- Consult your router documentation for default IP addresses so you know how to change your settings.
- Check your router logs to ensure successful setup. Your router may have been previously made up as a default data network to control your smart products.

**2 Verify your network**

- Verify that your mobile device is connected to a 2.4 GHz Wi-Fi channel.
- Consult the documentation for your router to find the default IP address.
- Check your router logs to ensure successful setup. Your router may have been previously made up as a default data network to control your smart products.

**3 Add devices to the system**

- From the app, select the device you want to add.
- Follow the on-screen instructions to complete the setup.
- If you have multiple devices, repeat the process for each one.

**3 Add a device**

- From your app, tap the "+" symbol on the top right-hand corner.
- Select your product type and follow the instructions within the app.
- If the connection fails, try using AP mode.

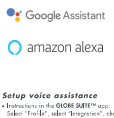

**3b Add a device: AP mode**

- On the left-hand side, select AP mode on the top right-hand corner and follow the instructions within the app.
- You're good to go!

**4 Setup voice assistance**

- In the app, select the voice assistant you want to use.
- Follow the on-screen instructions to complete the setup.

**4 Configure voice**

- Select the voice assistant you want to use.
- Follow the on-screen instructions to complete the setup.

**10 Troubleshooting**

- Check your internet connection.
- Verify that your device is connected to the correct Wi-Fi network.
- Restart your router and device.
- Consult the user manual for more details.

**Did you know?**

- **Mixed:** The mesh will broadcast both 2.4 GHz and 5 GHz and will connect to either the same SSID. The device will choose which to connect to based on its signal strength (longer range, distance to router, etc.).
- **2.4 GHz:** Broadcast only on this channel.
- **5 GHz:** Broadcast only on this channel.
- **Dual 2.4 and 5 GHz using Separate SSIDs:** Router will broadcast both channels and user manually decide which to connect to.
