Notes 1

1. Do not soak or wash your devices.
2. Keep products away from fire, high temperatures or any other extreme environment.

Notes 2

Home Center is required to enable Smart Dial to work with HomeKit technology. See https://www.terncy.com for more details.

Notes 3

We reserve the right to change or modify the manual.

Manual of
Terncy Smart Dial

V2.0 Edition

Smart Dial Introduction

Terncy Smart Dial is a small but powerful control terminal. You can easily pull curtain, change color temperature or brightness of light, adjust the volume of sound and control on-off state of any other switches by only one Smart Dial, which lets you enjoy intelligent life in a natural way.

* **The Smart Dial follows ZigBee 3.0 wireless protocol.**

Smart Dial

LED Indicator

Base

Install Guidance

1. Install the button cell battery into the Smart Dial.
2. Remove the adhesive tape from the base and place it as required.
3. Fix the Smart Dial on the base.

2. to damage resulting from repairing and introducing alterations by unauthorized persons;
3. to damage caused by using accessories not recommended by the manufacturer;
4. to damage resulting from other avoidable causes.

FCC Statement：

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference,and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However,there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.
