## RF exposure information according to FCC CFR 47 part 15, §15.247(i)

The Wristband blood pressure monitor is used as a portable device operating in 2402 – 2480 MHz band. It is equipped with an internal antenna.

## Maximum measured transmitter power:

Pout conducted		Maximum antenna gain,	Pout EIRP	
dBm	mW	dBi	dBm	mW
-9.72	0.107	-0.5	-10.22	0.095

SAR test exclusion threshold for 2.48 GHz at test separation distances 5.0 mm is as follows:

[(max. power of channel, including tune-up tolerance, mW)/(min. test separation distance, mm)] x

[√f(GHz)] ≤ 3.0

[0.095 mW/5.0 mm] x  $\sqrt{2.48}$  = 0.019 x 1.57 = 0.03 < 3.0, where 5 mm is the smallest distance from antenna to outer surface of the device.

According to KDB 447498 D01 v06 the device is excluded from SAR evaluation.
