Method of Operation
FCC Compliance

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1)This device may not cause harmful interference, and
(2)This device must accept any interference received, including interference that may cause undesired operation.
2.Changes or modifications not expressly approved by the party responsible for compliance could void the user's ability to operate the equipment.
NOTE:This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The distance between user and products should be no less than 20cm.

Method of Operation
Maintenance

The cash drawer slide should be periodically cleaned and lubricated. Frequency is dependent on use and the environment, but typical recommended frequency is every three months. Using a dry, lint free cloth, wipe out the old grease and debris from the inner and outer slides. Do not use water or any type of liquid cleaner. Using a clean applicator, apply a thin layer of lithium based bearing grease to the inner and outer slides. Cycle the slides several times to properly coat the Polyurethane rollers and to spread the grease evenly.
