•HCD01 Programming Instructions

Information and Safety Warnings

- Failure to follow these instructions could result in damage to the product and void the factory warranty.
The accuracy of the door preparation is critical for the proper functioning and security of this product.
This lockset is designed to provide the highest standard of product quality and performance.

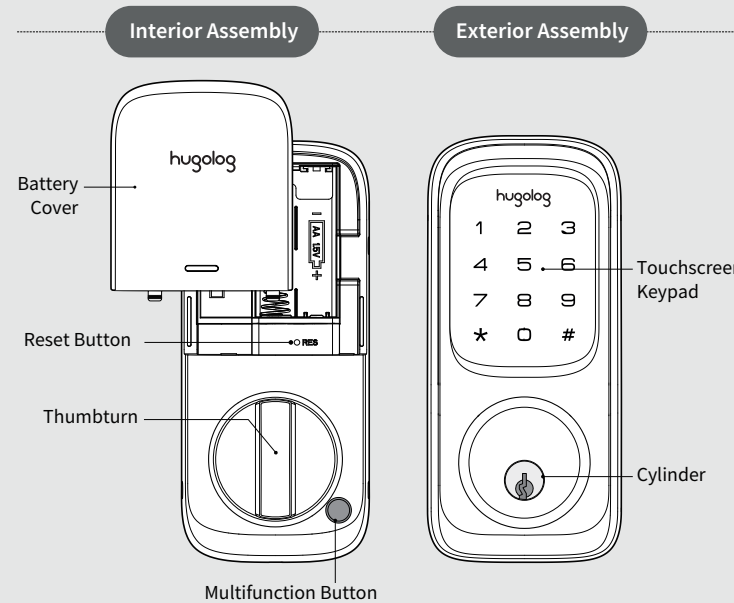

(▲ NOTE: Do not load batteries until lock is completely installed.)

- 1. Master PIN Code (4-10 digits): The default master pin code is "12345678", It's required that you change it to a code of your own before programming.
2. User PIN Code (4-10 digits): A total of 20 user codes (and one temporary one-time user code) may be programmed.
3. Neither master nor user PIN codes support the following combination of numbers.

Table listing prohibited PIN code sequences: Forward number sequence, Backward number sequence, Repeat number sequence, and sequences containing existing code sequences.

Parts Illustrations

Table with columns: ITEM, SPECIFICATIONS, REMARKS. Lists Exterior Assembly, Interior Assembly, and Battery specifications.

(▲ CAUTION: Master and User PIN code have 4-10 digits, the default master PIN code is 12345678. Please change it prior to programming of the lock)

Definitions

- Master Code: Required for programming and feature settings.
Auto Unlock: Automatically locks the deadbolt 30 seconds after unlocking.
Wrong Entry Limit: After 10 unsuccessful attempts at entering a valid PIN code, the unit will shut down for 3 minutes.
Silent Mode: The beep sounds when pressing keypad can be muted.
Vacation Mode: This is a security feature for you when you are leaving your home for vacation or long trip.
Unlock with Fake Code: User can prevent PIN code from exposure by entering random digits before after PIN code.
Privacy Mode: When the privacy mode is activated, the door cannot be opened from outside except with master PIN code.
