Smart Plug and Gateway
HUB1, G1, DDL203

works with alexa | works with Hey Google

1. Product schematic

operation	status
Power on the device	The device indicator changes from off to always on.
Press and hold the RES button for 5 seconds	The device restores factory settings and enters the Internet connection state.
The device is connecting to the internet	The device indicator is flashing.
Click the button to switch the device status	The status indicator is off when the device is turned off; the status indicator is always on when the device is open.

2. Download KK Home App
Scan the QR code to download the KK Home App from the App Store or Google Play.

works with App Store | works with Google Play

IMPORTANT:
Please add the G1 gateway in the KK Home App, and then add the smart lock.

Step1: Create an account for the App.
If you are a regular user: This is a device, and you can integrate it into your KK Home App for easy control.
If you are a new user: Please click the "Sign Up" button to create your account.

- Fill in your email ID
- Enter the verification code received in your email inbox
- Set up an account password
- Create an account successfully

Step2: Add the G1

1. Power on the device.

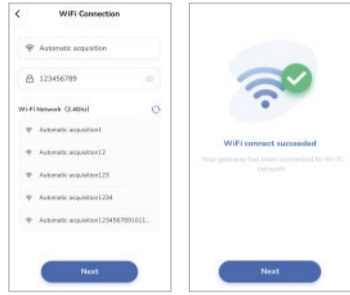

2. Open the App and scan the QR code on the device.

3. Find the RES button on the device, press and hold it for 5 seconds.

4. Set up Wi-Fi connection, it only works with 2.4G Wi-Fi network.

Step3: Add the smart lock in the App.

Please refer to the App guide for the smart lock.
Note: Before adding a smart lock in the App, please make sure the G1 gateway has been added successfully.

Technical parameters

Maximum current: 10A
Rated voltage: 100-240V
Rated power: 2200W
Input voltage: 100-240V

Troubleshooting

What should I do if the gateway fails to be added?

1. Ensure that your router works properly. The router should be connected to the internet. Troubleshoot the issue of the router by changing the Wi-Fi network or using your phone's hot spot.
2. Turn off Advanced Wi-Fi settings for the router, like Band Steering (which also named "Smart Connect" or "Whole-Home Wi-Fi"), Wi-Fi Optimizing or Channel optimization and so on.
Note: The G1 gateway only supports 2.4G Wi-Fi, rather than 5G Wi-Fi.
3. View the Wi-Fi signal by using Wi-Fi ANALYZER App.
Strong: more than -50 dBm
Good to Average: among -70 dBm to -50 dBm
Poor: less than -70 dBm
Note: If RSSI is less than -70dBm, the signal is too weak,

the device will keep disconnecting and relocating the smart device or router to get a stronger Wi-Fi signal. Please make sure that the gateway is placed within the signal range of the router. The distance between the gateway and the smart lock is within 32 feet (10 meters).

4. Try changing DNS settings of the router.
Primary DNS: 8.8.8.8
Secondary DNS: 8.8.4.4

The gateway has been added successfully, but it can't be controlled remotely. What should I do?

1. Please review if you have added the G1 gateway before adding the smart lock.
2. Please make sure the distance between the gateway and the smart lock is within 32 feet (10 meters).

How many locks are supported by one gateway?
One gateway can work with 3 smart locks.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

8. ISED Statement

English: This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

The digital apparatus complies with Canadian CAN ICES-3 (B)/NMB-3(B).

French: Cet appareil contient des émetteurs/récepteurs exempts de licence qui sont conformes aux RSS exempts de licence d'Innovation, Sciences et Développement économique Canada.

L'exploitation est soumise aux deux conditions suivantes :

(1) Cet appareil ne doit pas provoquer d'interférences.
(2) Cet appareil doit accepter toute interférence, y compris les interférences susceptibles de provoquer un fonctionnement indésirable de l'appareil.

l'appareil numérique du ciem conforme canadien peut - 3 (b) / nmb - 3 (b).

This device meets the exemption from the routine evaluation limits in section 2.5 of RSS 102 and

compliance with RSS 102 RF exposure, users can obtain Canadian information on RF exposure and compliance.

cet appareil est conforme à l'exemption des limites d'évaluation courante dans la section 2.5 du cnr - 102 et conformité avec rrs 102 de l'exposition aux rf, les utilisateurs peuvent obtenir des données canadiennes sur l'exposition aux champs rf et la conformité.

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment.

Cet équipement est conforme aux limites d'exposition aux rayonnements du Canada établies pour un environnement non contrôlé.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Cet équipement doit être installé et utilisé à une distance minimale de 20 cm entre le radiateur et votre corps.
