If any parts are missing or damaged, please contact Customer Support.

1 Prepare the door and check dimensions

A

Measure to confirm that the hole in the door is 1-1/2" or 2-1/8" (38mm or 54mm)

Measure to confirm that the hole in the door edge is 1" (25mm).

B

Measure to confirm that the backset is either 2-3/8" or 2-3/4" (60 or 70mm)

C

Measure to confirm that the door is 1-3/8" to 2" (35 mm to 50mm) thick.

D

Make sure the hole in the door frame is drilled a minimum of 1" (25mm) deep, to leave enough space for the deadbolt to extend into the door frame when the door is locked.

Notes: Make sure the door frame is aligned with the door.
There are no obstructions stuck in the door frame.

STEP

2 Install the latch and strike

A Determine backset and adjust the latch

Hold the latch in front of the door hole, with the latch face flush against the door edge. Is the slotted hole centered in the door hole?

YES

No adjustment is required. Proceed to next step.

NO

Slotted hole is NOT centered.

Rotate and pull the latch as shown to extend latch.

B

Install the latch

C Use a screwdriver to test if deadbolt works smoothly.

D Install strike on the door frame.

! IMPORTANT:

Make sure the hole in door frame is drilled a minimum of 1" (25mm) deep.

3 Install exterior assembly

! IMPORTANT:

Before installation, make sure the latch is fully retracted (in the unlocked position)

A Measure the diameter of the hole in the door.

1-1/2" (38mm)

Remove the spacer

2-1/8 (54mm)

Proceed to next step

B With the latch fully retracted (in the unlocked position), route the cable below the latch, and insert the torque blade through the slot in the latch.

C Secure the mounting plate with the supplied screws. Short Mounting plate screws are applied to the door with thickness of 35mm-45mm. Long Mounting screws are applied to the door with thickness of 45mm-50mm. Do not overtighten screws.

STEP

4 Install interior assembly

STEP

5 Install Door Sensor

IMPORTANT:

Door sensor should be mounted within 1" (25mm) from the edge of your door, within 1" (25mm) from the top of the interior assembly.

--	--	---

UNLOCK the door from inside

Rotate the thumb turn to Unlock position.

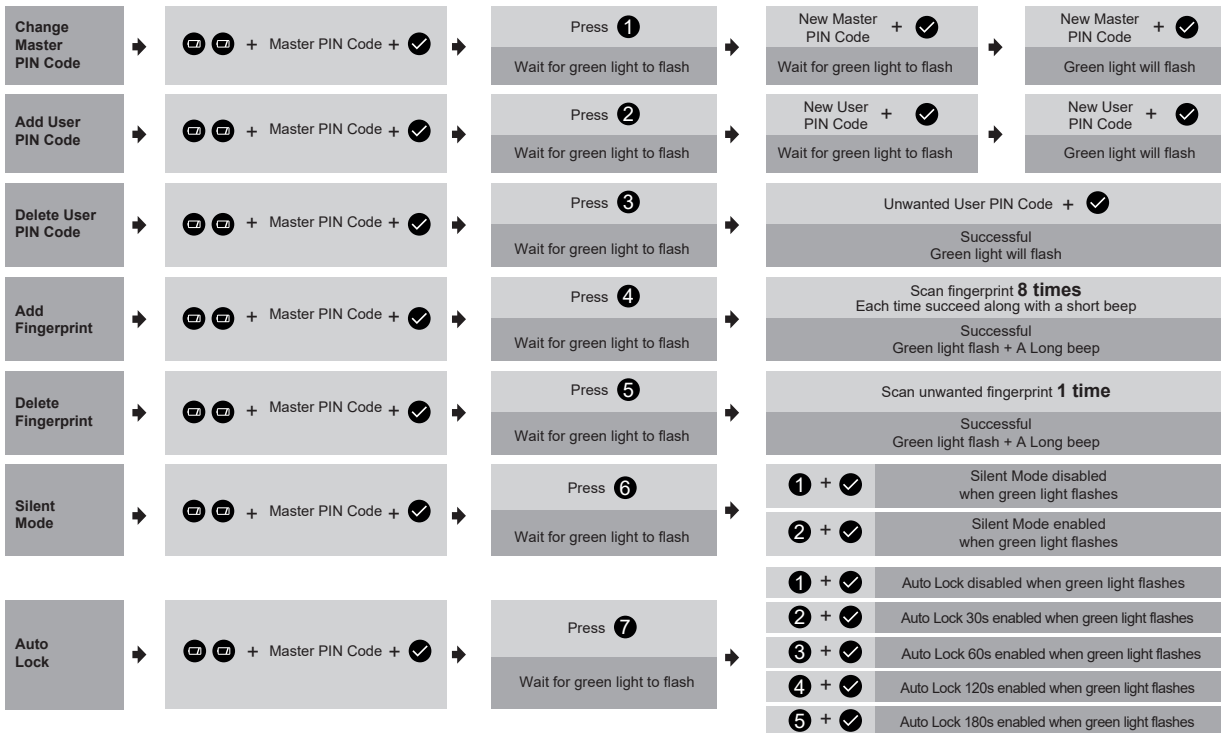

LOCK the door from inside

1 Auto Lock Mode In Auto Lock mode, the device will be locked automatically.	2 Rotate the thumb turn to Locked Position.
---	---

**IMPORTANT:**

The default Master Code is **12345678**. It is required that you change it to a code of your own before programming.

Quick Set Up

**Notes:**

1. Beeps only sound when the Silent Mode is disabled.
2. If the indicator light flashes red, your setting failed and you will need to redo the operation.

Download KK Home App

Download KK Home App from the App store or Google Play.

Quick Set Up Tips

- Register an account in KK Home App
- Scan QR code on the inside panel to add KWFP01 to the device list
- Follow the setup steps to get started.

IMPORTANT:

- The Auto Lock is disabled by default, please complete the set up process and enable Auto Lock in App.
- The administrator of the lock will be the first account to bind it by default. The administrator account have access to manage users of the lock.
- To reset the smart lock, please press and hold the Reset button on the interior panel for 5 seconds. Log in the App with Administrator account, go to setting and unbind the lock. (This step is required, if the administrator account didn't unbind the device, the lock won't be able to be repaired by other accounts.)

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution!

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Canada Statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

In order to avoid the possibility of exceeding the ISED radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage.
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Afin d'éviter la possibilité de dépasser les limites d'exposition aux fréquences radio ISED, la proximité humaine de l'antenne ne doit pas être inférieure à 20 cm (8 pouces) pendant le fonctionnement normal.

FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be

installed to provide a separation distance of at least 20 cm from all persons.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Industry Canda Statement

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication.

Warnings

Failure to follow the below instructions could result in damage to the product and void the factory warranty.

This manufacturer advises that no lock can provide complete security by itself.

This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property.

No lock can substitute for caution, awareness of your environment, and common sense.

Product Care:

- This lockset is designed to provide the highest standard of product quality and performance. Care should be taken to ensure a long-lasting finish. When cleaning is required, use a soft, damp cloth. Using lacquer thinner, caustic soaps, abrasive cleaners or polishes could damage the coating and result in tarnishing.
- Avoid exposure to direct sunlight. Long-term exposure to direct sunlight may damage the lock.

Do not install batteries until the lock is completely installed on door.

- User Pin Codes: Can be 4-10 digits and can be set up in KK Home App.
- Door sensor calibration: To calibrate your door, please follow the instruction in App step by step. Once it's calibrated successfully, you could try detect the status of your door in KK Home.
- Share your device: Share your device means that you share the access to track the device with your other users, please be aware of the potential risks it may cause.
