Subject: C2PC for FCC ID:

To whom is may concern:

The purpose of this C2PC change request is to modify the Somewear Labs, Inc. grant of certification, FCC ID: 2AQYN9603N (Single Modular), which was originally certified for mobile RF exposure conditions, to use in a portable RF exposure configuration in a Somewear Labs Host, which is more completely described in this application. To evidence compliance with FCC requirements utilizing the requested portable configuration, a SAR test has been performed and is being provided with this application.

A SAR configuration evaluated in the Somewear Labs Host, Model SWL-1, was for simultaneous transmission of the Somewear Labs Model 9603N module (FCC ID: 2AQYN9603N) and Laird BL652 SA01 (FCC ID: SQQL652).

The Host Manufacturer, Somewear Labs, Inc. has confirmed to Iridium that is will make no changes to the Iridium Model 9603N, if the requested equipment authorization is granted and Somewear Labs, Inc. installs it with its Host, without prior notice to Iridium and the receipt of an equipment authorization from the FCC.

Sincerely,

DocuSigned by:
