

SUPERNOTE *Nomad*
Quick Start Guide

Model name: A6 X2-W

Don't Panic

Specifications

Display

7.8 inch monochrome digital-paper display
1872 × 1404 resolution (300 DPI)
E Ink Carta Display

Size & Weight

191mm (L) x 139mm (W) x 6.9mm (H)
265g

Operation System

Chauvet - Handwriting OS based on Android

Work Environment

0°C - 40°C
32°F - 104°F

Battery

Model: U2366130PHV
2700mAh 5V ⚡ 2A
Rechargeable (USB type-C)

Memory Storage

4GB RAM
32GB FLASH memory (Expandable)

* This product does not include a power adaptor,
please use one that meets the industrial standard.

Important information

* Ratta will not be responsible for data loss, deletion, or corruption
resulting from improper or abnormal operation, Force Majeure. Ratta also
cannot be held liable for any indirect damages or losses.

Screen Safety

The screen is delicate - please protect it from bumps, drops, scratches, or anything that could apply damaging force.

Magnetism and Static Hazard

Keep clear of powerful magnets and static electricity buildup which can harm internal components.

Operating Conditions

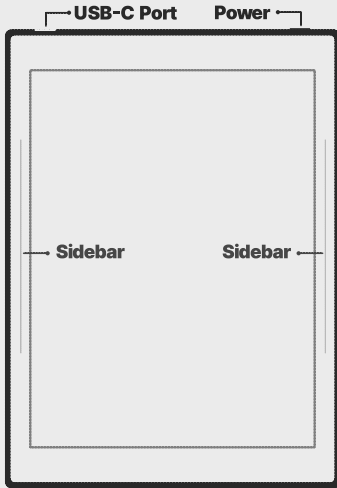

Please avoid exposing the device to extreme or hazardous environments that could cause damage, including high or low temperatures, excessive dryness or humidity, smoke, and heavy dust.

Liquid Exposure Caution

This device is not waterproof. Please avoid contact with any liquids, including water, which could cause damage to components.

Warranty Coverage for Internal Repairs

The product warranty only remains valid if internal components are accessed by following official instructions solely for sanctioned replacement purposes. Unauthorised disassembly voids the warranty.

Activate your Supernote

1 Power on

Long press the power button to power on your Supernote device.

2 Setup

Follow the on-screen instructions to start your first note.

FCC Statement

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information

SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model device is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC Test s for each device are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model device has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the eut a minimum of 0 mm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.

ISED RSS Warning/ISED RF Exposure Statement

ISED RSS Warning: This device complies with Innovation, Science and Economic Development Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Le présent appareil est conforme aux CNR d'ISED applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

1. l'appareil ne doit pas produire de brouillage, et
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Note: For 5150-5250MHz is only for indoor use.

RF Exposure Information (ISED SAR) :

This device has been tested ISED SAR and meets the ISED limit.

Informations sur l'exposition aux RF (ISEC SAR) :

Cet appareil a été testé ISEC SAR et respecte la limite ISED.

Remarque: pour 5150 ~ 5250 MHz est uniquement pour une utilisation en int é rieur.

Specific Absorption Rate (SAR) information

SAR tests are conducted using standard operating positions accepted by the ISED with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model device is available for sale to the public, it must be tested and certified to the ISED that it does not exceed the exposure limit established by the ISED T est s for each device are performed in positions and locations (e.g. at the ear and worn on the body) as required by the ISED .

For body worn operation, this model device has been tested and meets the ISED RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the eut a minimum of 0 mm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.

Information sur le débit d'absorption spécifique (das)

Le test SAR est effectué à l'aide d'un poste d'exploitation standard reconnu par la ISED et le dispositif transmet à son niveau de puissance certifié le plus élevé dans toutes les bandes de fréquences testées, bien que Le SAR est déterminé au niveau de puissance certifié le plus élevé et le niveau de SAR réel de l'appareil en fonctionnement peut être bien inférieur au maximum, généralement plus vous êtes proche Plus la puissance de sortie de l'antenne de la station de base sans fil est faible. Avant de vendre un nouveau modèle d'appareil au public, il doit être testé et démontrer à la qu'il ne dépasse pas les limites d'exposition spécifiées par la ISED.

Chaque appareil doit être testé à l'endroit et à l'emplacement (par exemple, dans les oreilles et sur le corps) conformément aux exigences de la ISED.

Pour le fonctionnement usé par le corps, ce modèle d'appareil a été testé et répond à l'exposition RF ISED Directives lorsqu'il est utilisé avec un accessoire désigné pour ce produit ou lorsqu'il est utilisé avec un accessoire qui ne contient pas de métal et qui positionne l'eut à un minimum de 0 mm du corps.

Non - respect des restrictions ci - dessus
