

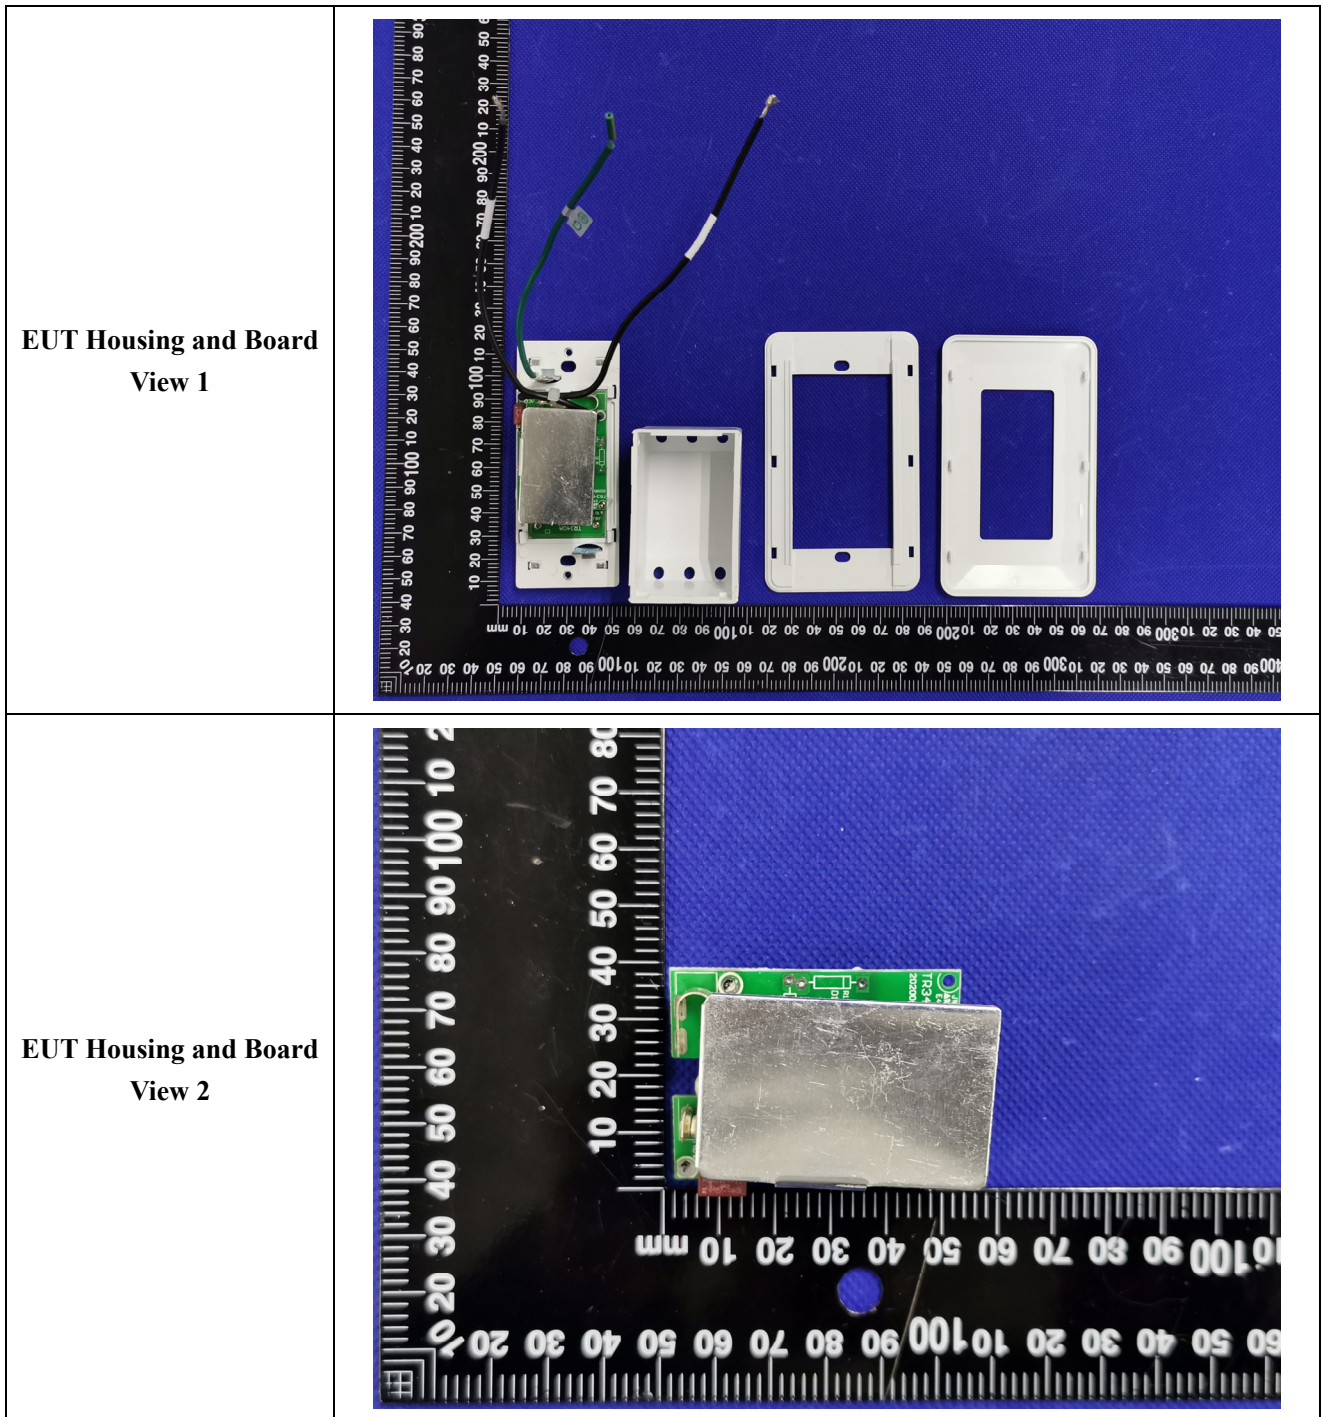

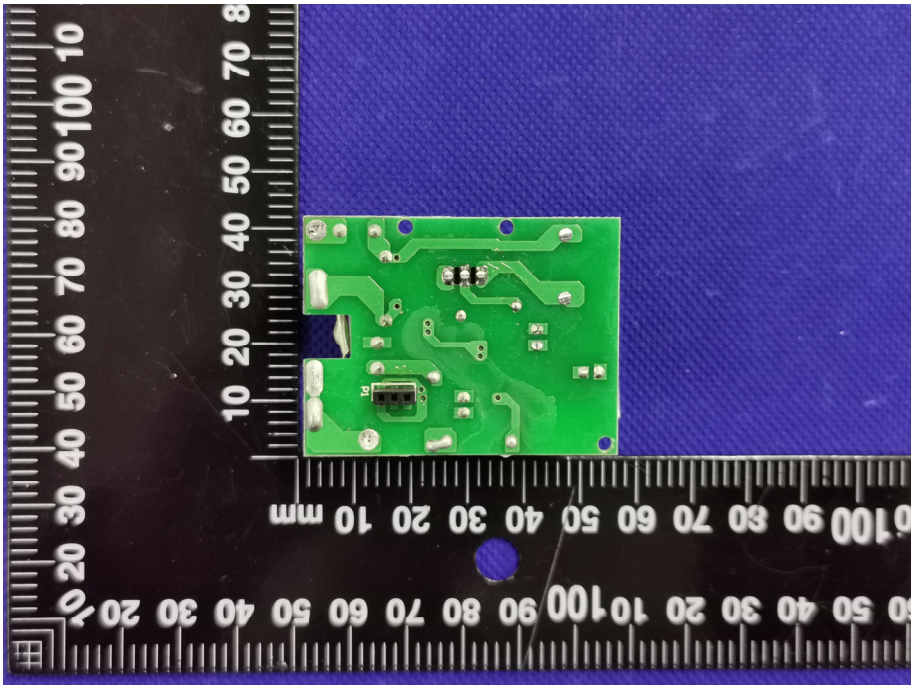

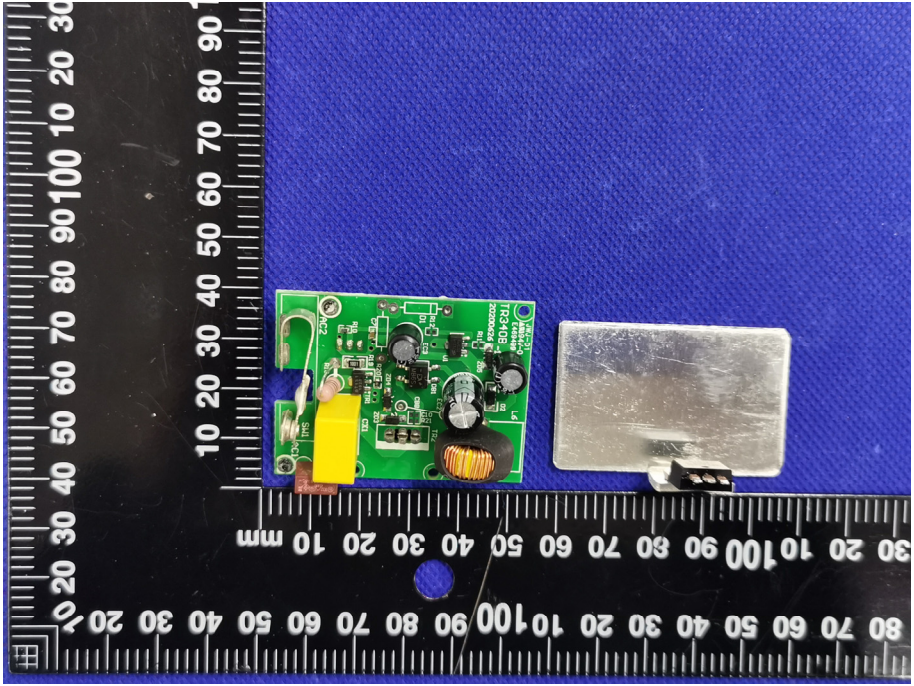

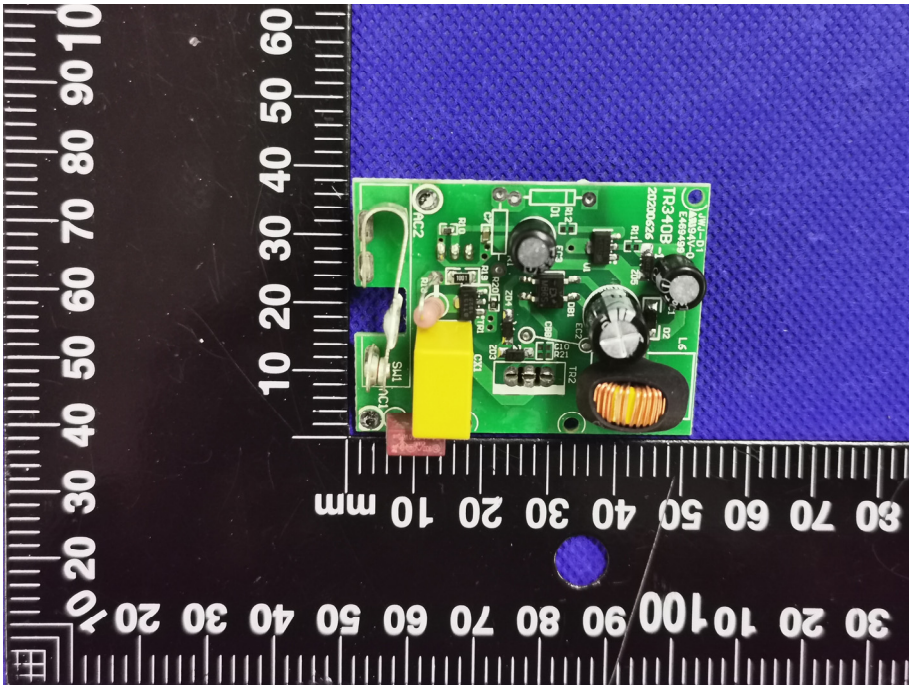

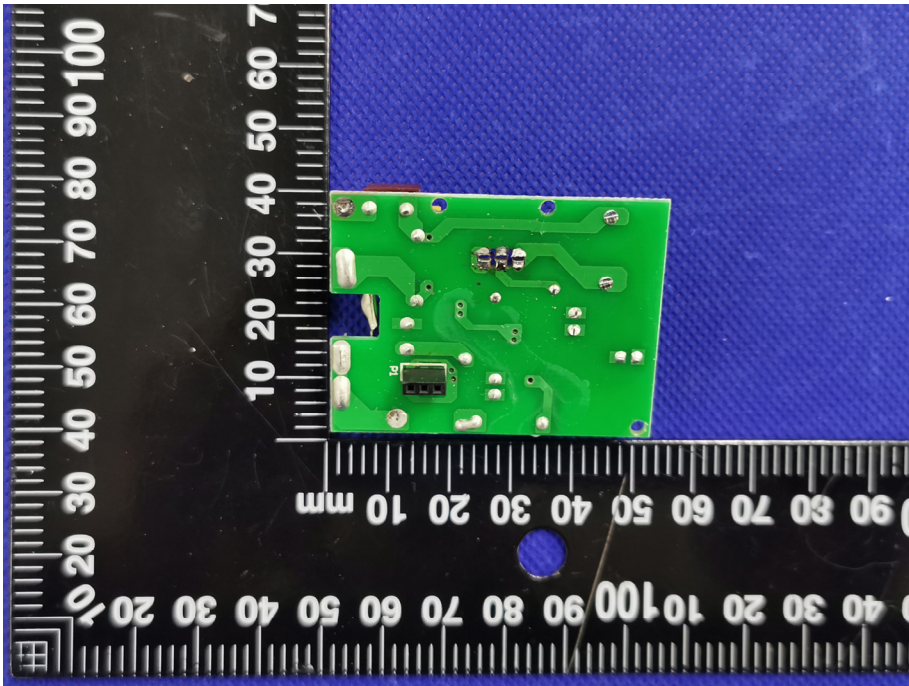

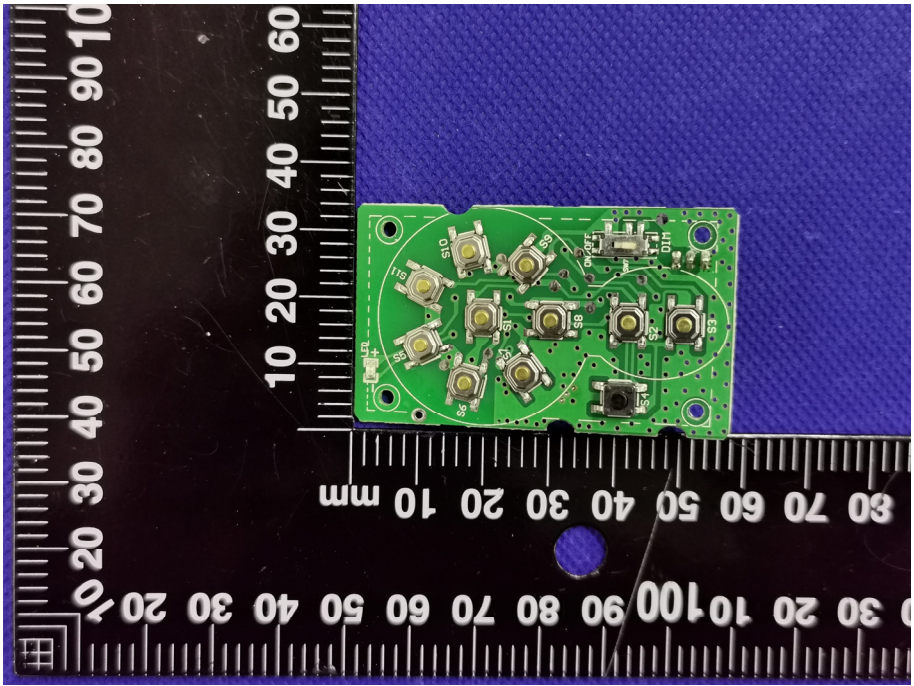

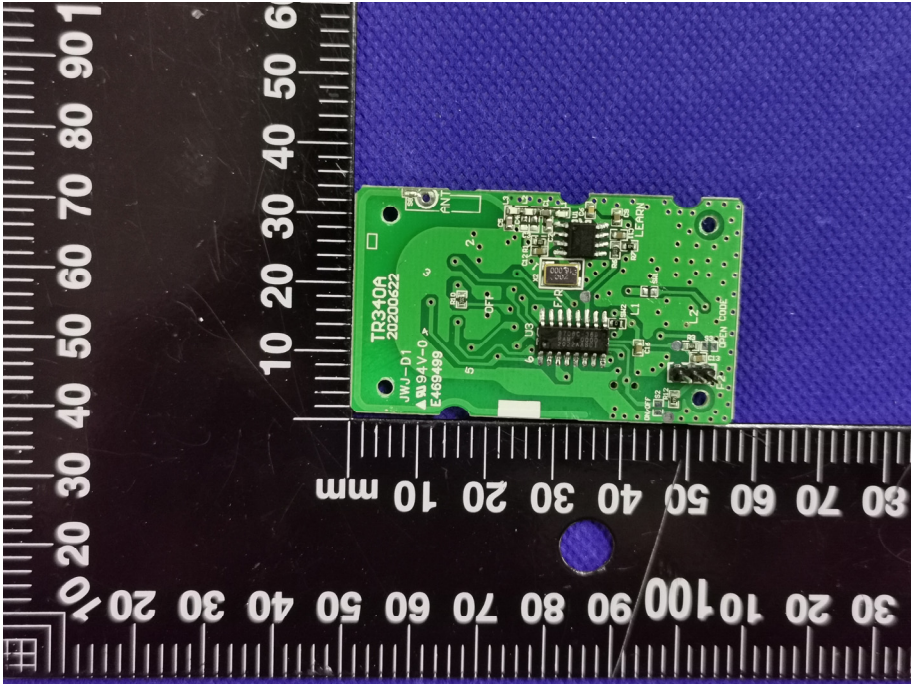

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph of a small green printed circuit board (PCB) component. The board is rectangular and populated with several surface-mounted components, including a central integrated circuit (IC) and various passive components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 40 mm in width and 20 mm in height.</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing two PCB components. On the left is a green PCB populated with various components, including a yellow capacitor, a silver electrolytic capacitor, and a copper-wound inductor. On the right is a separate, larger silver component, possibly a heat sink or a specialized IC, with a small black component attached to its bottom edge. Both components are placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the green PCB component spanning approximately 40 mm in width and 20 mm in height, and the silver component spanning approximately 40 mm in width and 10 mm in height.</p>

<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 3'. The board is populated with various electronic components, including a large black toroidal inductor (L5), several resistors, capacitors, and integrated circuits. A yellow component is visible on the left side. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length being approximately 100 mm and its width around 40 mm.</p>
<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 4'. This view shows the reverse side of the board, which is populated with various electronic components, including resistors, capacitors, and integrated circuits. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length being approximately 100 mm and its width around 40 mm.</p>

<p>Solder Board-Component View 5</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '5', showing several solder joints. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The component has several circular solder joints and various electronic components like resistors and capacitors.</p>
<p>Solder Board-Component View 6</p>	 <p>A photograph of a green PCB component, labeled '6', showing a large integrated circuit (IC) and other components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The component has a large IC with the text 'TR340A 20200622' and 'JWU-DI' visible. Other text includes 'A1854A-0' and 'E-65489'.</p>
