# Abyen 支比森 security information

The following markers are used in this product and manual to mark important safety signals.

		<u>_</u>
warn!	warn!	warn!dangerous voltage! May
security risk! It may lead to	Read the user manual before	cause equipment damage or
equipment damage or safety risk	the operation	electric shock

Warning: Be sure to understand and follow all safety guidelines, safety instructions, nings and precautions in this manual.

This product is only used for professionals' operation!

This product may lead to combustion, electric shock and fall.

Read this manual carefully before installing, supplying power, running and missioning this product.

Follow the safety instructions on the manual and on the product. If you have any questions, please ask Absen for help.

Beware of electric shock!

To prevent electric shocks, the equipment must be properly grounded during installation. Don't ignore the ground plug

The function of the head, otherwise the danger of electric shock will occur.

In case of lightning, please disconnect the power supply of the equipment, or provide other applicable lightning protection protection

protect. If the device is not used for a long time, please unplug the power plug.

Close the main switch during any installation and repair work (e. g. removing the fuse).

When not using the product, or before disassembling or installing the product, please disconnect the AC power supply.

AC power used must comply with local building and electrical codes and must be equipped with overload

And ground fault protection.

The main power switch shall be installed close to the product and at obvious and easily accessible

square. This can timely disconnect the power supply in case of failure. Before using this product, check all distribution equipment, cables and all connections devices

current requirements.

Use the appropriate power cord. Please use appropriate power supply after budget power and current

Line, and ensure that the power cord is not damaged, aging, damp, found any overheating phenomenon, please immediately renewal.

For other questions, please consult with professionals.

## Beware of fire!

To avoid fire due to overload of power cable, protect with circuit breaker or fuse. Maintain good ventilation around the screen, controller, power supply and other products, at least 0.1 m apart from other items

space.

Do not hang any items on the screen.

Do not modify the product, do not add or subtract parts. Do not use it at ambient temperatures above 55 ° C.

Beware of injury!

Warning: Manufacturers are not responsible for incorrect, inappropriate, irresponsible, unsafe system assembly behavior.

## Handle the product

For detailed information on collection, reuse and recycling, please contact the local or ional waste management unit.

For more details of the environmental performance of our products, please contact us.

		projector * x 2	

\* Wireless screen projector is optional and needs to be purchased separately. For details, please refer to the all-in-one configuration list.

# **1.2 Product Overview**

Al BOX 410 Control box is a 4K ultra HD control box, which is a meeting screen control box developed based on Android system. It integrates the functions of sending card and Android system card, and is compatible with OPS Windows function. It supports Windows, Mac OS, IOS and Android multi-platform terminal wireless screen casting, with up to four screen screen casting. At the same time, for different conference application scenarios, the four scenarios are provided, so that the document demonstration, video playback, remote meeting, can match the best display effect.

# .3 1 Product features

- Max support for display with 38402160@60Hz resolution (point-to-point display)
- 5 channels for HDMI 2.0 input (1 for connecting OPS and 1 for pure send mode).
- 1-way HDMI 2.0 output.

- 6-way USB interface, used for multimedia material playback and function expansion.
   -5 USB2.0 (2 items reserved)
  - 1×USB3.0。
- The 16-road gigabit network port output.
- 13.5mm audio output for external audio.
- Support the display screen output screen playback.
   -The input source of 19201080@60Hz can zoom out to 104104 and zoom in to 28801620.
   -The input source of 28402160@60Hz, zoom down to 104104 and zoom up to 40962160.
- The customized desktop UI system based on Android can add third-party APP applications.
- Support for multi-screen body terminal wireless screen projection.
   Including the Windows, Mac OS, IOS, and Android systems. Up to 4 wireless screen display at the same time.
- The terminal APP can realize the wireless screen projection control.
  - -Mirror reverse control: the speaker reverse controls the LED meeting screen through the terminal.
  - -Wireless snapshot: Wireless screenshots at any time through the terminal, recording the details of the meeting.
  - -Wireless speech: Participants speak directly through the terminal microphone, and the voice can be wirelessly transmitted to the sound system of the conference screen.
- Support for local, online HD video playback.
  - Support for the HEVC / H.265/H.264 and other mainstream coding formats of 4K ultra HD video decoding.
- Dual WiFi mode.
  - Wifi morning and wireless hotspots can be opened simultaneously.
- Support the picture quality and effect adjustment.

Provide standard, soft, cinema, video 4 scene mode, and can customize the brightness, saturation, contrast and other parameters.

- Support one key to open the eye protection mode.
- Support for whiteboard writing and annotation.
- Supports Bluetooth 4.0.

Can connect the Bluetooth remote control, Bluetooth mouse, Bluetooth keyboard, Bluetooth audio and other common peripherals.

- Reserve OPS host control interface to realize OPS host switch control.
- Compatible with mainstream conference peripherals, including cameras, audio, laser pointer, etc.
- HDR function

Support for HDR10-Optima and HLG. Restore the video to express the brightness range and color space, is the picture is more realistic.

• Picture quality engine.

Improve the display effect from the following 3 dimensions (the specific effect is related to the drive IC):

-Color management: manage the display color gamut to make the display color more accurate.

-Fine gray scale (65536 step by step ash scale calibration): calibrate the 65536 ash scale (16bit) of the driving IC, optimize the low ash jump, back jump, color deviation, hemp point and other problems of the display screen, to make the display screen more uniform and delicate.

-22bit +: Increase the gray scale of LED display by 64 times to solve the problem of gray loss in low light, make the image bright dark details richer and the display effect more delicate.

## screen

Step 1 can be connected to the computer through the USB Mini interface or through the network port. Mode 1: USB connection, connect to the upper computer through the Mini USB port on the AI Box 400. Method 2: network port connection, through the AI BOX 400 network port.

(The default IP of the control box is 192.168.0.10 when configuring the computer IP. AI BOX400 Control box supports network port backup, does not support device backup)

1. Connect the upper computer computer through the network port;

2. Right-dick the lower right corner of the desktop to open the Network and Sharing Center.

3. Select Local Connection> Properties> Internet Protocol Version (4 TCP / IPv4), to enter the configuration IP interface.

4. Click "Use the IP address below" to configure the computer IP to the  $192.168.0.2 \sim 192.168.0.254$  network segment, and click OK.

## MAC OS System computer projection screen

Use the screen mirror to direct the screen.

PC connected to Absenicon conference screen hot spot (default name Absenicon\_XXXX, password default 12345678); click the "Screen Mirror" icon in the upper right corner and select the corresponding device name to complete the screen casting;

## Method three: mobile phone projection screen projection

Android System mobile phone projection screen

(1) First, scan the mobile phone with the QR code in the "Quick screen" to download the "Transcreen" APP, and successfully install it on the mobile phone;

(2) Mobile phone connected to Absenicon conference screen hot spot (name default: Absenicon\_XXXX, password default: 12345678);

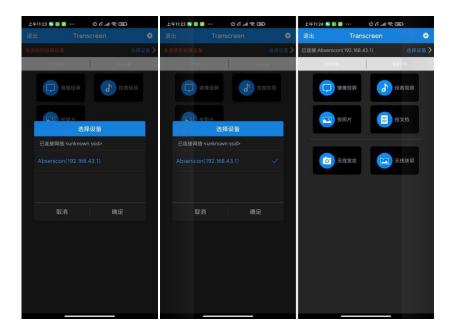

(3) Run "Transcreen" and select the corresponding equipment name;

(4) Select "Screen Mirror" to complete the mobile phone screen projection.

After downloading and installing the Transcreen software, open the software interface as follows, which is not connected to the authorized device. At this time, you need to connect the WIFI hotspot to the conference screen (name default: Absenicon\_XXXX, password default: 12345678), and then open Transcreen APP, select the corresponding device name, and connect the conference screen device.

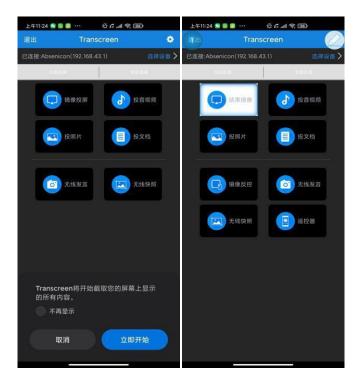

## 3.7.2Android Version of the Transcreen function introduction

#### Mirror cast screen

Click "Mirror Screen", the following prompt appears, click "Start Now", you can upload the signal displayed by the mobile phone to the meeting screen;

## Throw photos / audio and video / file

Click "Send photos" to upload the photos stored on the phone to the meeting screen;

Click "Projection Video" to upload the video and audio stored by the phone to the meeting screen; click "Document projection" to upload the files stored in the phone to the meeting screen;

## Mirror anti-control

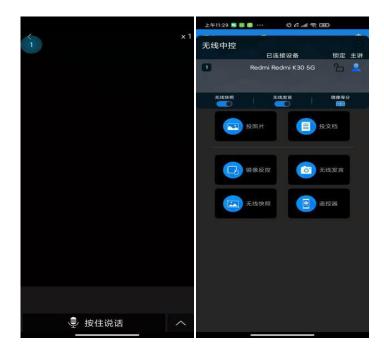

The speaker can walk freely in the lecture hall, through the Android phone or tablet to reverse control the PPT computer; click "mirror reverse control" to realize the mirror reverse control function;

#### Wireless speech

With wireless speaking support, listeners can use their mobile phone as a microphone to speak directly, and the voice is then wirelessly transmitted to the built-in speaker on the conference screen.

(1) Click "Display the master control ball" on the conference system interface to enter the wireless central control interface, and open the permission of "wireless speech";

(2) Long press the "wireless speech" button to speak directly;

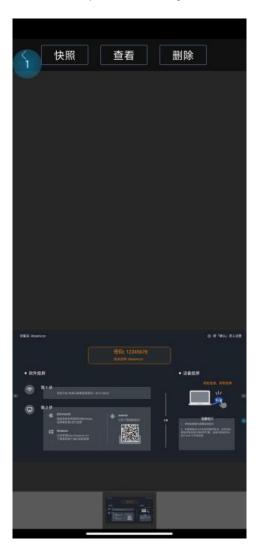

## Wireless snapshot

Support wireless snapshot function, the audience can put the speaker on the display device of the complete screen down, and transmit back to their mobile phone, stored in the designated location.

(1) Click "Display master ball" on the conference system interface to enter the wireless central control interface and open the "Wireless Snapshot" permission;

(2) Long press the "Wireless Snapshot" button to capture the meeting screen screen;

## telecontroller

Support remote control function, can control the meeting screen menu selection and turn the page

## Iphone Mobile phone screen projection (mobile phone image)

(1) Use the mobile phone to connect to the Absenicon meeting screen hotspot (default name: Absenicon\_XXXX, password default: 12345678);

- (2) Swipe up from the bottom of the screen to open the control center;
- (3) Click "Screen Mirror", select Absenicon\_XXXX, to complete the mobile phone screen projection;

## Iphone Mobile phone screen projection (Transcreen software screen projection)

(1) Search for the "Transcreen" APP in the App stor, and successfully download and install it on the mobile phone;

(2) Mobile phone connected to Absenicon conference screen hot spot (name default: Absenicon\_XXXX, password default: 12345678);

- (3) Run the "Transcreen" app and select the corresponding device name;
- (4) Select "Screen Mirror" to complete the mobile phone screen projection.

iPhone Version of the Transcreen function introduction

Open the Transcreen software, the home page is as follows, and the screen is not connected to the authorized device; then connect the conference screen wifi, enter Transcreen, click "Connect device" to select the meeting screen to be connected;

11:33 🕈		ad 🕆 🔳	11:33 🛪		ail 🗟 🗖

## 3.8 Access to the signal source

Use the HDMI line to connect the Absenicon conference screen HDMI port to one end and the PC to one end.

#### 3.8.1 Signal source switching

The user can switch over the multiple signal sources in the following three ways.

#### 3.8.2, multimedia presentation

On the main interface of the conference screen system, click "Multimedia Demonstration" to enter the multimedia presentation interface.

Select the source for screen demonstration, press the remote control confirmation key to switch successfully.

#### 3.8.3, Remote control menu

Short press the menu button on the remote control and enter the menu bar.

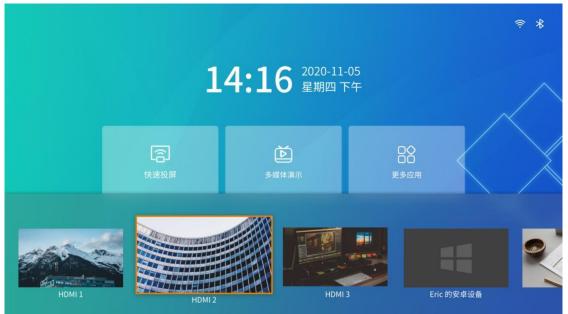

- (1) Click "Signal Source", and the source switching interface is popup at the bottom of the screen;
- (2) Select the source for screen demonstration, press the remote control confirmation key to switch successfully.

#### 3.8.4 Signal source switching of the remote control

(1) Short press the "signal source switch" button of the remote control, and the source switch interface is pop up at the bottom of the screen; (see 5.1 button description for the distribution of remote control keys)

(2) Select the input source for screen projection demonstration, and press the remote control to confirm the key to successfully switch the input source.

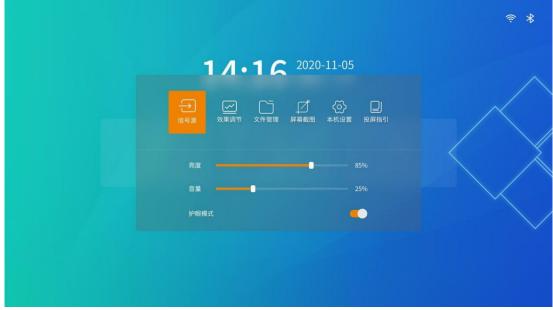

## 3.9 Display the effect settings

To adjust the display effect to obtain a more comfortable viewing effect, it can be done in the following ways.

### 3.9.1 Scene mode

Absenicon Conference screen is specifically for different conference application scenarios, providing four scene modes, whether document demonstration, video playback, teleconference, can match the best display effect.

- Standard mode: the default mode, which can cover most usage scenarios.
- Soft mode: suitable for document demonstration, PPT play and other scenes with more text.
- Cinema mode: suitable for video, movie playback and other scenes.
- Meeting mode: suitable for more portrait scenes such as teleconference.

(1) Short press the menu button on the remote control to enter the menu bar;

(2) Click "Effect Adjustment" to enter the effect adjustment interface, and select the corresponding mode according to your actual needs.

	-		
饱合度 💻	-		
色温 🗕			
色调 🗕	-	 25%	
护眼模式		-	

#### 3.9.2 Custom display effect

Users can fine-tune after choosing the scene mode to meet the personalized requirements.

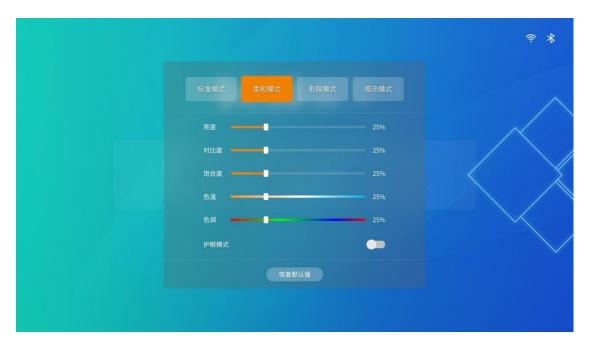

(1) Short press the menu button on the remote control, enter the menu bar;

(2) Click "Effect adjustment" to enter the effect adjustment interface;

(3) Customstom display effect by adjusting "brightness", "saturation", "contrast", "contrast", "Color Temperature" and "tone";

(4) If it is not satisfied with the current effect after the adjustment, click the Restore Default button to restore the default

parameters of the current mode.

#### 3.9.3 Eye protection mode

Absenicon The conference system supports one-click open eye protection mode.

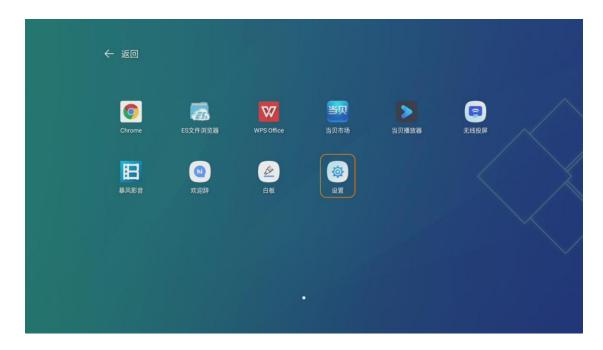

(1) Press the menu button on the remote control and enter the menu bar.

(2) Click the "Eye Protection Mode" button to turn on / off the effect of the eye protection mode. Explain that: after the eye protection mode is opened, the screen display will be slightly yellow.

## 4. Dealing with common problems

order number	frequently asked questions	terms of settlement
1	Mobile phones do not search for hot spots on the conference screen	<ol> <li>Check whether the conference screen system is turned on for wireless hotspots, and turn it on in the system setting network;</li> <li>The WIFI module of some mobile phones does not support 5G wifi function, so it is necessary to change the system Settings&gt; Network&gt; hotspot&gt; channel from 5G band to 2G band</li> </ol>
2	There is noise in the sound	Check whether the external audio equipment is well grounded, and it is recommended to add an audio isolator
3	Throw in sound and video without sound	Check the audio device and check whether the system volume is off
4	Wireless screen projection lag, large delay	Compared with HDMI cable transmission, the wireless screen projection scheme itself has the disadvantage of picture quality compression. The scheme itself is a compromise of picture quality and real-time, and there is a normal phenomenon in the loss of picture quality. The delay time of screen projection is measured by the timer, the transmission distance is within 10m, the delay of static projection is less than 120ms, and the delay of dynamic projection (playing video, etc.) is less than 170ms, which is considered normal. If the picture is serious, please check the network connection and antenna connection to confirm that the wireless transmission link works ideal, and the Wi-Fi band works in the 5G band.
5	Wireless screen activation failure or the input activation code dialog box	Confirm that the Internet access is effective, and the judgment way is to open the browser and open the web page is normal. If displayed, please enter the activation code and contact the market support personnel for the activation code input.
6	After the Bluetooth sound is connected, the system volume, player and Bluetooth volume are normal, and there is still no sound when	Al BOX400 The built-in Mee200 conference card Bluetooth in the control box is version 4.0, which does not support Bluetooth 5.0 version on the market, such as PX Chase High Fidelity Bluetooth 5.0 receiver. It is recommended to use audio cable connection or use Bluetooth speakers with version 4.0 and below

	playing.	
7	The Bin file upgrade failed	<ul> <li>The Bin file upgrade needs to meet the following four conditions, please check one by one.</li> <li>① Confirm that the U-disk format is FAT 32.</li> <li>② Check whether there are upgrade files in the U disk root directory, if not, please save the upgrade file in the root directory.</li> <li>③ Confirm that the U disk can be correctly detected and identified by the system, insert the U disk system can pop up the U disk detection prompt, push</li> <li>④ Select USB3.0 interface as the upgrade interface. If the above conditions are met and the upgrade has not been successful, please replace the U disk of other brand specifications and try again.</li> </ul>
8	The projector inserted into the computer will not start the projector	<ul> <li>① Confirm that the screen projector has been successfully paired with the Android card, and the conference card hotspot has been opened</li> <li>② Close the anti-virus software, security guards, etc., replug and plug the screen transmitter.</li> <li>③ Manually run the upper screen casting software according to the path below.</li> </ul>
9	Remote control device infrared control distance is short, slow response	<ol> <li>Confirm the correct installation and layout of the infrared receiver to ensure the effective receiving Angle, without metal shielding.</li> <li>Make firm the remote control battery is sufficient.</li> </ol>
10	The infrared touch frame does not take effect after insertion	Please submit the ID of the infrared touch frame that is not work after insertion to A bsen Technical Support
11	The system cannot start normally, the indicator is out or on	Check the supply voltage of the system to ensure that the voltage at the conference card power outlet is 5.1V.
12	Fast upload correction coefficient failed	HDMI to Point-to-point, see see Source Settings.

13	Android boot flash screen, U disk play	Setting it to a passive black screen on the NovaLCT can solve the problem Step 1 Run NovaLCT, select "Login> Synchronize Advanced Login", and log in to the advanced user interface. Step 2 Select "Settings> Presave screen" and enter the "Presave Picture Settings" interface. Step 3 set to passive black screen and click Send> Save to Hardware.	
	video flash screen	● 単福次果       拉伸       例此效果         ● 扩展屏幕       保存到硬件       查看存結面面         功能设置           开机画面           自用           回加时间:           沙松坊肝           ● 黒屏       ● 显示上一轴画面       ● 预存画面         ● 黒屏       ● 显示上一轴画面       ● 预存画面         ★送       保存到硬件	
14	Remote control is lost, how to switch the signal source or control the conference screen	An external USB mouse or Bluetooth mouse to operate the meeting screen.	
15	Press the wireless screen projection for no response	If the projector activation fails, follow the following steps to activate the projector. Step 1 Make ify the network connection is normal before activation. Step 2 In the main interface of the conference screen system, click "Wireless screen casting" to enter the wireless screen projection interface, as shown in the figure below Image: the strength of the strength corner of the interface, and select "Activation Information" column in the pop-up menu bar.	

		起新位置   版本位息   加速価値   加金布符   MedLas-01b8、>   設幹所设置   1   加速価値   加速価値   1   <		
		Step 4 Click "Commercial Activation", enter the provided activation code in the		
		dialog box, and you can successfully activate the wireless screen casting software.		
		構用激活 × 素ii(入注)(5%) 値定 取消		
		remarks:		
		1. It is known that the wireless screen projection needs to keep the screen projection device and the control box system in the same network segment, requiring the mobile phone or computer to connect to the hot spot of the control box.		
		2. When the product is commercially activated by default.		
		1. Check whether the volume value of the meeting screen installation table system		
	AI Box 410	is set to 0;		
	Connect the	2. Check whether the player volume is set to 0 when the video is played;		
	stereo through	3. Check whether the sound equipment used is turned on and whether the volume		
	the 3.5mm	is turned on to the minimum;		
16	audio port,	4. Audio system does not support hardware decoding. For example, Blu-ray HD		
	and the stereo	player, the source code output is some codes related to Dolby and DTS, the audio		
	has no sound	coding in the HD source is output without software decoding, directly to the		
	when playing	speaker or power amplifier, which is decoding by the special decoding chip of		
	the video	these devices, and the audio required to support DTS and Dolby hardware		
		decoding.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
