## Smart Light

A19/A60 LED smart bulb 

PN120209P2 PN230172P2

①

To connect your new bulbs to your Amazon Alexa.

echo plus

For more information on installation and use, please find us by:

 GMY smart led bulb

②

If you have Amazon Echo Plus

Power your echo plus and turn on your light switch. Ask Alexa to “discover devices”, the bulbs will be successfully connected while they flash for 3 times.

Start the Amazon Alexa app and follow the instructions.

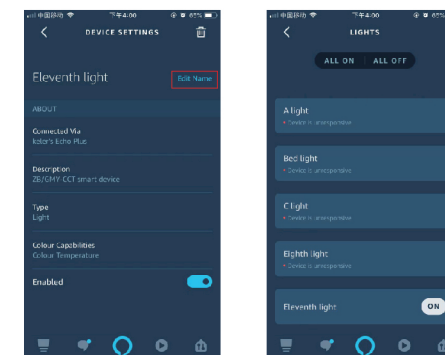

### DISPLAY LIGHTS

- Click home 
- Then lights 
- The lights list will be displayed.

③

### EDIT NAME

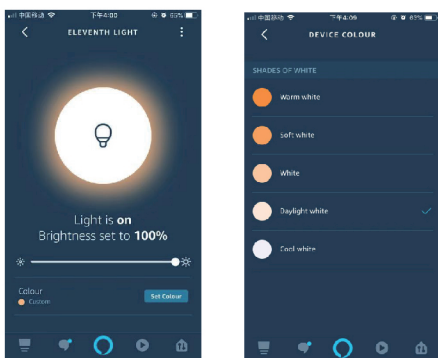

Select the new bulb(new device) to edit the name. For example, name the bulb as bedroom light, kitchen light, bedroom light, etc.

④

### CONTROL THE LIGHTS

Manage each light to be on/off, preferable color temperature and brightness.

Easy voice control, take a light name “Hall light” for example:

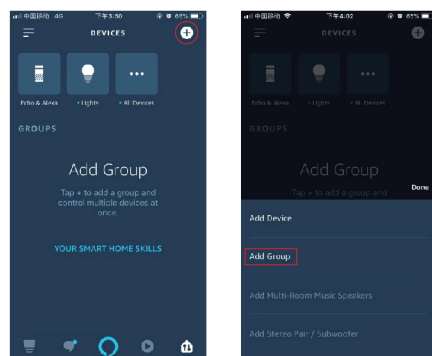

“Alexa, turn on the hall light”

“Alexa, turn the hall light to 20%”

“Alexa, turn the hall light to warm white”

⑤

### ADD GROUP & SCENE SETTING

Tap  to add group for scene setting. Manage each lights in the group to be on/off, preferable color temperature and brightness. For example, you may set brightness 80% and warm white color for “Dinner Mode”.

⑥

### RESET

Tap  and confirm to delete the light, and the light will be reset.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:-- Reorient or relocate the receiving antenna.-- Increase the separation between the equipment and receiver.-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.-- Consult the dealer or an experienced radio/TV technician for help. FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
