Eco Smart Display 100

Brighten up your business with VITRINEMEDIA's brand-new LCD display!

With its outstanding image quality and slim design, the ESD is the ideal solution for businesses and organizations looking for a reliable, high-resolution display that stands out.

High Brightness
Featuring a high brightness of 4000 nits and a matt effect to avoid window reflections, your picture will always be clear even in direct sunlight.

Auto Brightness Sensor
The display brightness is adaptive and varies according to the surrounding light conditions. In well-lit environments, the brightness is raised to enhance visibility, while in low-light settings, it is lowered to conserve power.

Open Pluggable Specification (OPS) Slot
The OPS slot follows international standard allowing you to use the VM Player (or any standard OPS player from the market), and hide it in the casing. This quick connection also eases maintenance or upgrade of players.

Remote Console
A platform dedicated to safely and remotely managing your display to give a seamless experience to your customers and decrease considerably the downtime of your display.

Energy Efficient
With a maximum power consumption of 230W, the display offers high energy efficiency with high brightness. ESD also offers a longer lifespan than traditional displays, meaning lower long-term costs.

Smart Thermal Management
The perfect display solution for window displays with regulated temperatures (0-50°C) and ventilated protection that maintain ideal operating conditions.

Compatibility
Compatible with the whole product range of fixation systems, back covers, and light-boxes suspension accessories.

Warning:
Changes or modifications to this unit not expressly approved by the party responsible Montserrat-Regularfor compliance could void the user ’s authority to operate the equipment.

NOTE:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC Radiation exposure limit set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
