

G.I. 8000mAh Wireless Power Bank User Manual

Thank you for using G.I. product. Before using G.I. product please read the manual carefully:

G.I. Dual coil power bank: Indicate with drawing on each items

1. Power On/Off button
2. 4 LEDs
3. Dual coil wireless transmitter (Qi Standard)
4. Micro USB input
5. Type C
6. Magnetic Connector
7. USB output
8. Support Stand

General Information:

- 1 G.I. Dual coil wireless power bank is designed wireless charger portable power bank. It serves as portable backup power on the go for your smartphone.
 2. Integrated Qi wireless charging technology (transmitting) for wireless charging all device conforming the Qi charging standard.
 3. Integrated high capacity, rechargeable lithium ion battery 8000mAh capacity.
 4. Beside wireless charging via Qi transmitting concept, also with wired charging via USB cable.
- Smart charging to prevent overcharging, short circuit

Product Specification:

ITEM	SPECIFICATION
Model	Power Stand X
Input	5V/2.0A/5W/10W
USB Output 1	5V/3.0A/7.5W/10W
Wireless Output	5W: 5V/1A (normal charging for phone not support fast charging)
	7.5W/5V/1.5A for iphone 8 & plus/X
	10W/9V/1.1A for fast charging Android
Cell Type	Lithium Ion Battery 8000mAH
Charging Efficiency	USB port output ≤ 92% 5W model: wireless charging output ≤ 65% 10W model: wireless charging output ≤ 70%
Charging Frequency	115KHZ ~205KHZ
Wireless Distance	0mm
Qi Compatibility	Qi Standard wireless receiver
USB Compatibility	Apple or Android devices, other devices with USB charging
Battery Indicators	2 Red LED's, each LED indicating 50% capacity
Charging Modes	Wire /wireless charging mode (blue LED on)
Colour	Glossy White
Dimension	180*79.5*16mm
Weight	220g

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC Radiation exposure limit set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
