Common faults	Treatment methods
The device is powered on	Check the line connection is correct,
but the front panel power	the outlet is energized, and the power
light is off.	adapter is consistent with the
	nameplate power supply.
Computer local connection	Check if the computer's network card
is not displayed, cannot	is up and the computer has obtained
successfully PING IP	the IP address. The computer is best
address of the device,	set to automatically obtain IP (DHCP
cannot open the WEB	need to open the device, the default is
page.	open), if it is manually set, make sure
	that the set IP address and the device
	in the same network segment.
The device is working but	Set the computer to automatically
cannot access the internet	obtain the IP address and DNS server
through the web	address.
Change admin page login	Long press the reset button for more
password or SSID	than 7 seconds to restore the factory
password, but forget	settings, and then from the rear body
password	nameplate for relevant information.

7、FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -- Reorient or relocate the receiving antenna.
- -- Increase the separation between the equipment and receiver.
- -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1)this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
