DISPOSAL AND RECYCLING INFORMATION

The following information should be read carefully before disposal of the device. The device should be disposed of in accordance with local regulations.

USA FCC EXEMPTION

This device complies with part 15 of the FCC Rules.

The device is exempt from the following conditions:

- The device must not cause harmful interference.
- The device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications must be approved by the party responsible for the equipment used and must not affect the operation of the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device. However, this equipment may cause radio frequency interference, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. It is the user's responsibility to correct the interference.

RF exposure statements

This equipment complies with FCC radiation exposure requirement set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance.

CANADIAN COMPLIANCE STATEMENT

This device complies with Industry Canada's technical specifications (ICES). Operation is subject to the following conditions:

- The device may not cause interference.
- The device must accept any interference, including interference that may cause undesired operation of the device.

RF exposure statements

This device complies with the ICSED RSS-102 RF exposure requirement set forth for an uncontrolled environment and is safe for intended operation as described in this manual.

USA FCC EXEMPTION

This device complies with part 15 of the FCC Rules.

The device is exempt from the following conditions:

- The device must not cause harmful interference.
- The device must accept any interference received, including interference that may cause undesired operation.
