

# Wireless Fast charger

## User Manual

Please read the user manual carefully before application.

**Notice:** The power displayed at LCD is based on the charging devices, power will reduce while the temperature inside the charging devices rises.

### Specification

ProductModel	S8
Input	5V=2.0A or 9V=1.67A
Output	5W/7.5W/10W
Standard	
Charge Frequency	110~205KHz
Charge Range	2mm~7mm
Charge Efficiency	≥75%

This user manual is for reference only, without any commitment in any form, please refer based on the real product.

### User Manual

1. Plug the power adapter into the socket.
2. Connect the USB power cable to the adapter with one end, and the other end to the wireless charger.
3. The voltage , current and power parameter will show on the charger' s display.
4. Put the mobile phone with Qi standard on the wireless charger in the right way, then the display shows the parameter of voltage, current and power, the mobile phone is now in the charging mode, the coolant fan of the charger also start working.

#### Notice:

1. This product supports fast charging when used with a quick charge power adapter. QC adapter is not included in the package.
2. The coolant fan inside the charger may cause slight noise in the state of fast charging.

Notice: For energy-saving purpose, please unplug the charger when not in use

### Precautions

1. Do not squeeze or collide, do not put any metal products on top of the wireless charger.
2. Do not disassemble or put into the fire or water, to avoid short circuit and leakage.
3. Do not use the wireless charger in severe hot, humid or corrosive environment to avoid damaging the circuit and causing leakage.
4. Do not place magnetic cards with magnetic stripe or chip (ID card, bank card, etc.) too close to avoid magnetic card failure.
5. Keep the distance between the implanted medical devices (pacemakers, etc.) and the wireless charger at least 40cm to avoid potential interference with medical devices.
6. Care should be taken to ensure that children do not use the wireless charger as a toy to avoid unnecessary accidents.

### Warranty

The product is guaranteed for one year under normal use, and man-made damage is not covered by the warranty

### FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:  
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.  
Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
• Reorient or relocate the receiving antenna.  
• Increase the separation between the equipment and receiver.  
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
• Consult the dealer or an experienced radio/TV technician for help.  
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.  
This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause

harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
Increase the separation between the equipment and any other radio device.  
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
