The diagram illustrates the correct and incorrect placement of magnetic cards near the wireless charger. It shows a smartphone being charged correctly. Below it, four scenarios are shown with a red 'X' indicating they are incorrect: 1. A credit card placed directly on the charging surface. 2. A credit card placed very close to the charging surface. 3. A credit card placed on a surface directly above the charging surface. 4. A credit card placed on a surface directly below the charging surface. A red 'X' is also shown in the center of the diagram, indicating that magnetic cards should not be placed near the charger at all.
