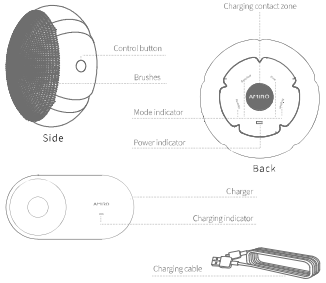
AMIRO

Facial Cleansing Brush Charger

User Manual

Product overview



How to use

• When the facial cleansing brush is turned off, press the control button to turn it on.

Switching modes

• To switch to vibration mode, press the control button again within 20 seconds after turning on the brush.
• The brush has a memory function and will restore the last-used mode upon start-up.

Mode lock

• If the brush remains on any mode for 20 seconds or longer, it will enter the mode lock state.
• Long press the control button to turn off the brush.

Smart alerts

• Charge cleansing area:
For 1 minutes after turning on, the brush will vibrate and pause briefly every 15 seconds to remind you to start cleansing another area.
• Cleansing complete
To protect your delicate skin, the brush will automatically stop vibrating after 2 minutes to remind you that cleansing is complete.

How to charge

When the battery's power level is less than 10%, it will enter a low-power state. The power indicator will start blinking.
Place the brush onto the charger (as illustrated below) to charge the brush.
The charging indicator will start blinking.

When the brush is fully charged, the charging indicator will light up without blinking.
Estimated charging time is 2 hours.

To keep the AMIRO facial cleansing brush in optical condition, we recommend the following:

- After each use, clean the brush's surface with soap and water, rinse with warm water, then wipe dry with lint-free cotton cloth or towel.
- Note: Please do not clean the brush with substances containing alcohol, oil or acetone.
- Do not use clay-based facial cleansers, silicone-soluble or granular facial cleansers, or exfoliating creams or scrubs together with AMIRO products.
- Avoid direct sunlight. Do not expose the product to extreme heat or boiling water.

FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.

This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Increase the separation between the equipment and anyother radio device.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
