Fareham, Hampshire,  
PO15 5RL, United Kingdom

29 January 2019

We: DetNet South Africa of

Block 1B Founders Hill Office Park, Centenary Road, Modderfontein, South Africa

Hereby declare that the CE4 Tagger V3 has the same technical construction including main circuit diagram, main PCB Layout, main components and component layout, all electrical construction and mechanical construction, with CE4 Tagger V4. The difference lies in the additional functionalities added to the V4 tagger. The CE4 Tagger V4 has an NFC reader and a wireless charging functionality added. Both these receiver coils are added to the back of the main PCB enabling the use of these additional functionalities. The different marketing names used (GeoShot, DigiShot, DigiShot Plus and SmartShot) are for different regions and type of mining applications using the same hardware.

Yours Sincerely,

Herman van der Walt  
Quality and Compliance Manager
