Purpose of Change

Dear Sir/Madam,

Re: Application for a Class 2 Permissive Change filing with FCC ID: 2ARNZ-1003.

The purpose of this document is to describe all the changes that are made on the **WWAN module** (wireless transmitter) to the new designed family model with specified host from the original model in order to meet the requirements.

Changes of WWAN module from the original model to the new designed model:

- The physical configuration is changed from a **Single-modular transmitter** to a **Limited single-modular transmitter**. The physical enclosure and RF exposure condition are changed from a 20cm separation from human body to Portable Device (< 20cm) with Host, PCB and Antenna.

Single-modular transmitter: A complete RF transmission sub-assembly, designed to be incorporated into another device that must demonstrate compliance with FCC rules and policies independent of any host.

Limited single-modular transmitter: A single-modular transmitter that complies with the § 15.212(a)(1) modular rules, only when constrained to specific operating host(s) and/or associated grants condition(s).

Similarities of WWAN module between the original model to the new designed model:

- Design, circuitry or construction (i.e. electrically identical).
- RF parameters for data communication.

Sincerely,

Michael J Gregory
