

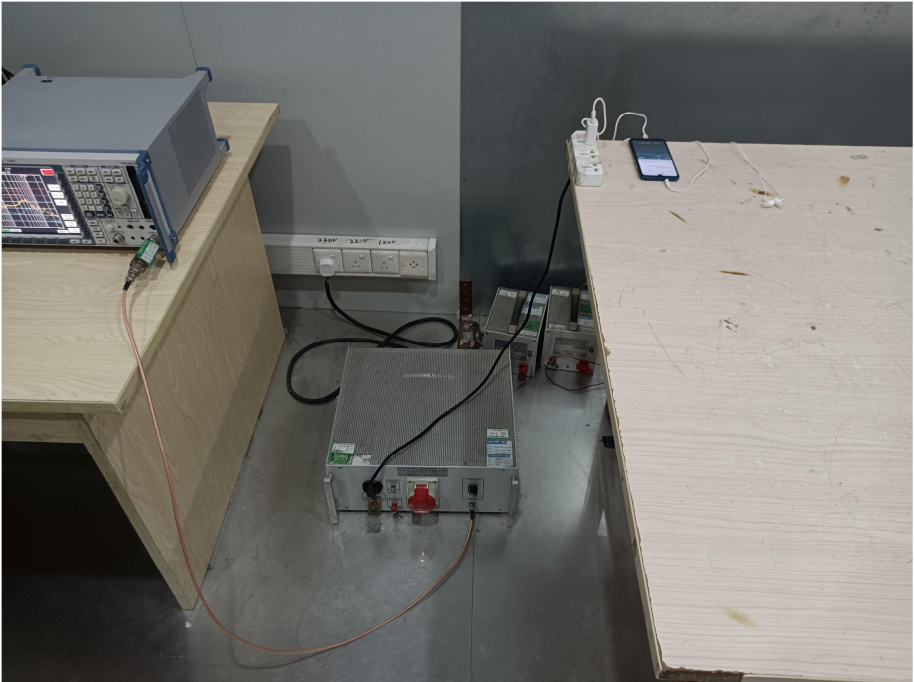

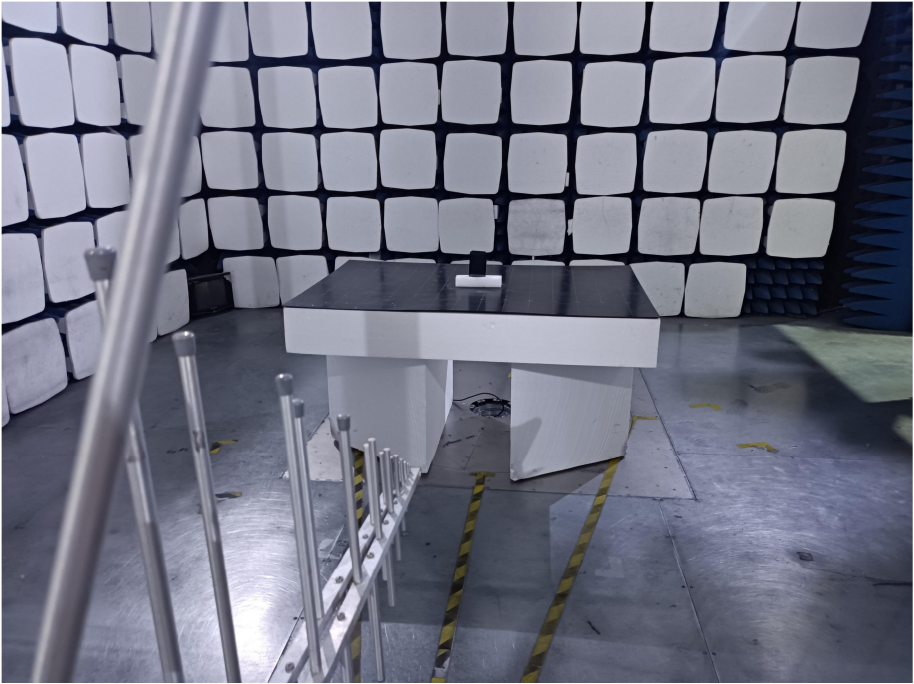

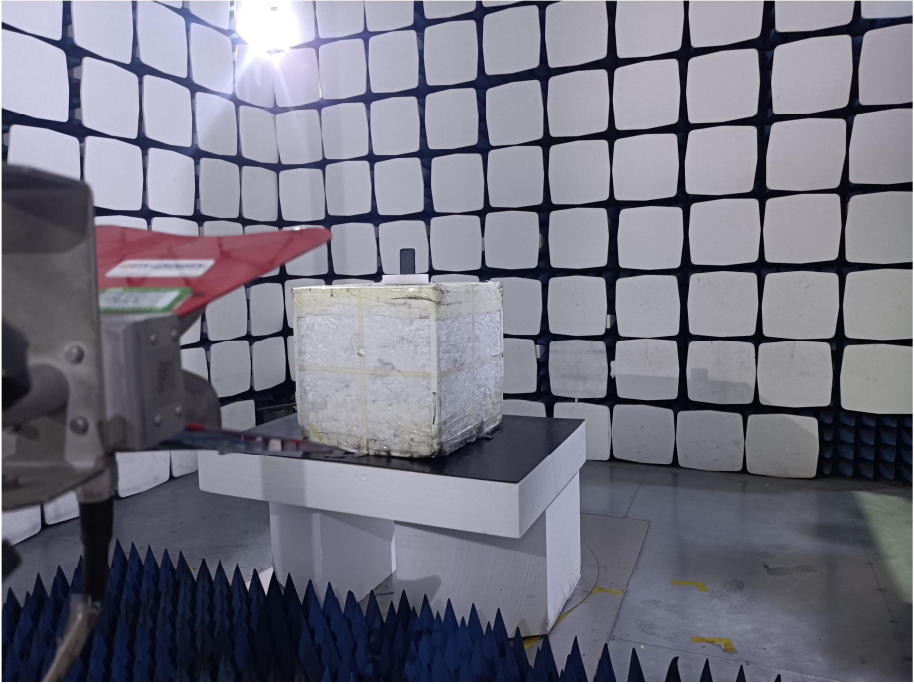

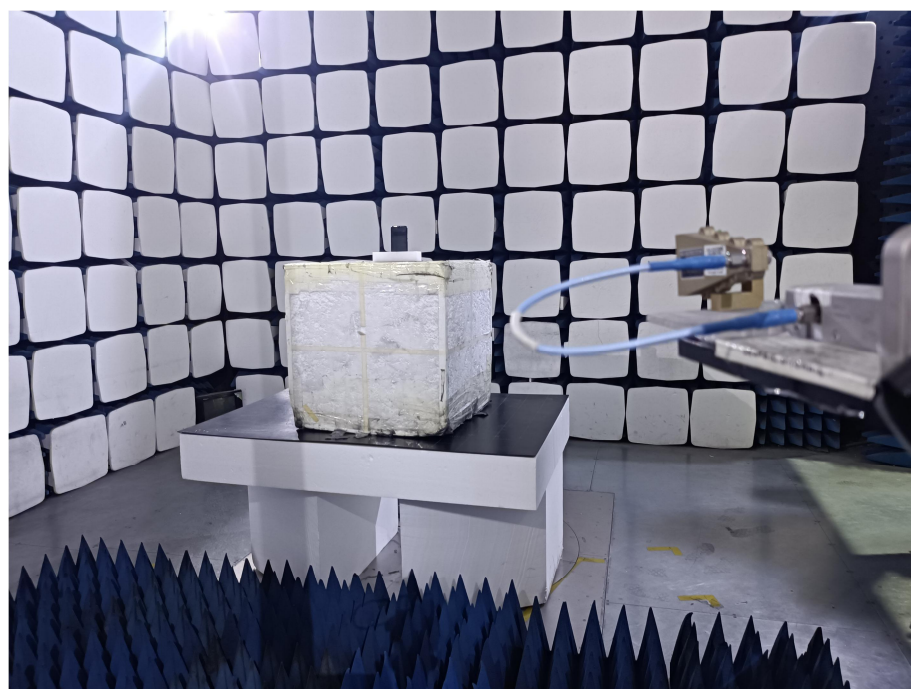

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a wooden table holds a spectrum analyzer and a power supply unit. A red cable connects the power supply to a device on the floor. To the right, another wooden table holds a smartphone connected to a power source. The floor is concrete, and a power strip is visible on the wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A device is placed on a metal stand inside an anechoic chamber, which is lined with white pyramidal absorbers. The floor is marked with yellow and black caution tape.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz range. A white, rectangular test chamber is positioned on a metal stand. The chamber is surrounded by a dense array of white, square-shaped anechoic tiles. A metal frame with vertical rods is visible in the foreground, likely part of a probe or antenna system. The floor is a light-colored, polished surface with yellow and black safety markings.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz range. A white, rectangular test chamber is positioned on a metal stand. The chamber is surrounded by a dense array of white, square-shaped anechoic tiles. A red, rectangular object is visible on the left side of the chamber. The floor is a light-colored, polished surface with yellow and black safety markings.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
