

**Cover letter for C2PC**

This application for C2PC is prepared to add a new model variant to the following certifications:  
FCC ID: 2AROD-004  
IC: 24483-004.

The PMN of the new variant is Varjo Aero and HVIN is Aero. The radio parts between Varjo Aero and the original product XR-3 are identical, except for minor changes in the antenna tuning components. The effect to conducted antenna power and spurious emissions have been measured in the attached test report. The other differences between the two variants is the removal of some non-radio features including Video-See-Through cameras, hand tracking cameras, ToF camera and focus displays. These changes can be verified from the attached "Block diagram and HW architecture.pdf", and the visual differences can be seen on the document "external photosLQ.pdf".
