### Charging your wireless device

IMPORTANT: Before using BricksPower, for the first time, fully charge it (so that pressing the charge status button lights all 4 status LEDs).

1. Connect BricksPower Transmitter to BricksPower 3000mAh Battery.

2. Place your mobile device on the BricksPower Transmitter. Slightly press, your device and Nano-suction will combine tight and stable. The press the power switch (as above imaged), Charging will begin on contact.

3. If the Battery is out of power, use Micro USB cable and 5V adapter to charge it.

### LED Indicator

- BricksPower has 4 white Light LED built-in. Each light indicates 25% of the battery volume.
- Every time before charging your device, you need activate the power switch.
- When charging your device, the green breathing light will keep flashing.
- Battery is being recharged: A white light will keep flashing. From 0% to 100%, when the battery is 25% charged, 1 white light will keep on. 50% charged, 2 white lights will keep on. 75% charged, 3 white lights will keep on. 100% charged, 4 white lights will keep on.
- A RED indicator will keep on when FOD (Foreign Object Detection) is in operation.

### Daily Care

- Keep BricksPower dry and away from moisture and corrosive materials.
- Too much dust on the Nano-suction may cause poor adhesion, please wipe it with a soft, water-dampened cloth to renew the perfect adhesion of the Nano-suction.

### **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
