

Charge System

Instruction Manual

FCC ID: 2ARR4-ML10801

1、Product Specifications

Description

Charge System

Model No.

ML-108

Image

Dimensions

398 X 190 X 168 (MM)

External Design

Photo / Picture for reference

Power Bank Storage Quantity

10 pieces

Power LED Indicator

Single Color

Network LED Indicator

Green (Network Normal) / Red (Network Error)

USB Port

External USB-A

Charging Current

2A(MAX)

Operating Voltage

110-240V

Operating Temperature

0°C ~ 40°C

Operating Humidity

≤85 %RH

2、 Product Instructions

Installation

Place the machine on a desktop or any flat surface, connect the power adapter located at the back of the machine.

Power on the machine, the Power LED Indicator will be lit on. Wait for the Network LED Indicator to stop blinking.

Once the green light is on, Machine is ready to use.

To Return

After inserting the power bank, it will automatically be locked in the device. The backend will then read the device information and uploads it to the cloud server. It will notify user of the successful return after the confirmation is complete.

FCC caution

Federal Communication Commission (FCC) Radiation Exposure Statement

When using the product, maintain a distance of 20cm from the body to ensure compliance with RF exposure requirements.

FCC statements:

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
