

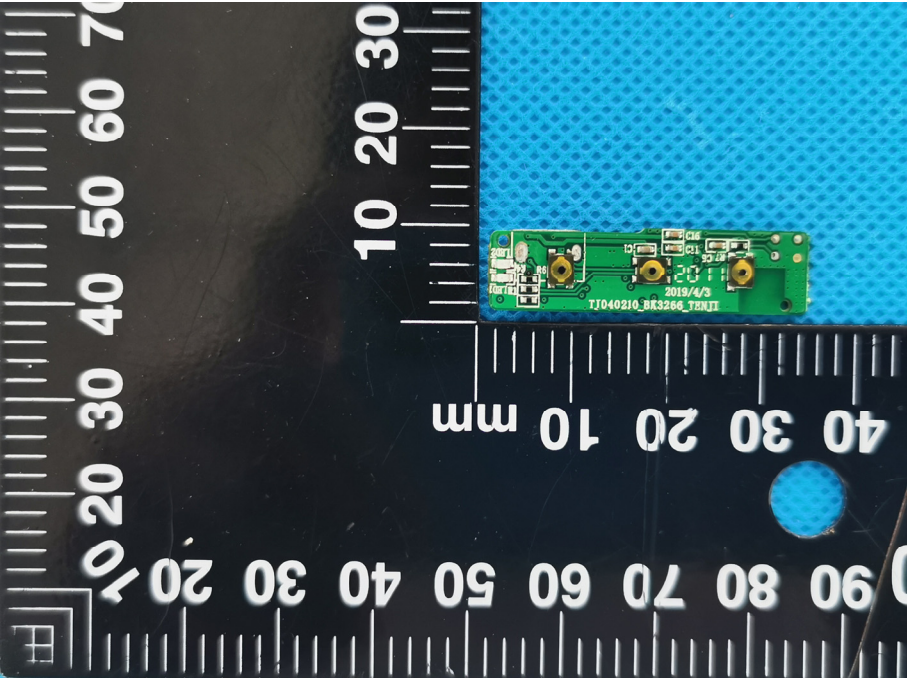

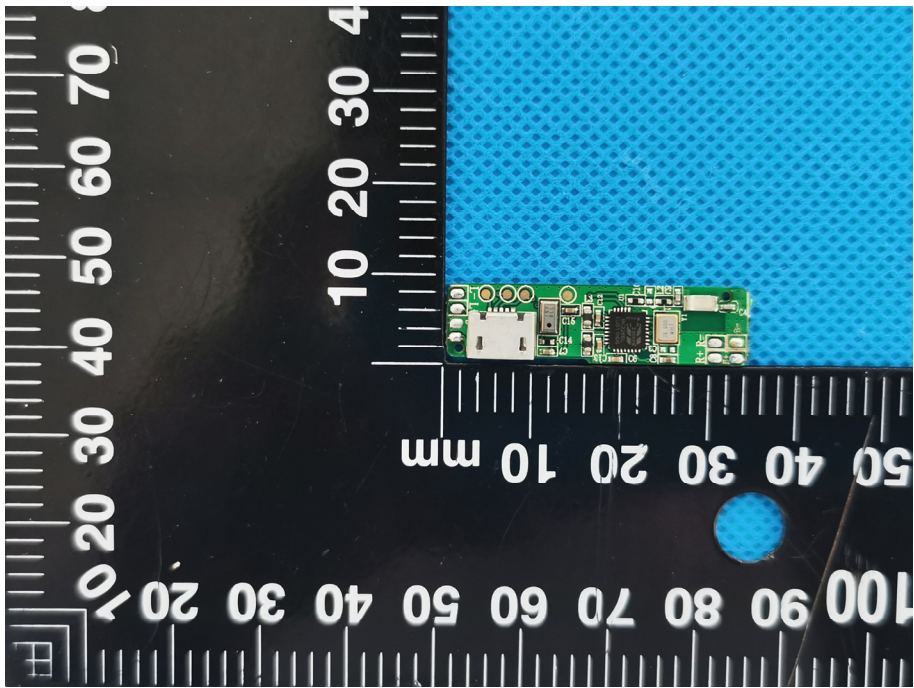

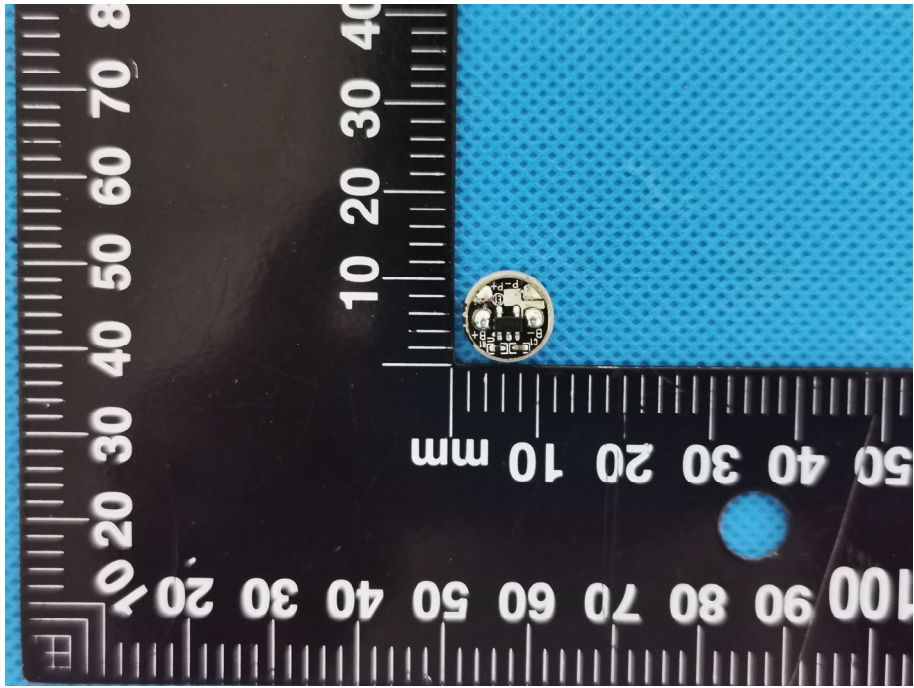

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>A photograph showing the internal components of an EUT (Earpiece Unit Test) housing. The components, including a green PCB, two earpieces, and various connectors, are laid out on a blue textured surface. A black ruler with white markings is placed vertically on the left side of the components for scale. The ruler shows measurements in millimeters, with markings every 10 units and sub-markings every 2 units.</p>
<p>Solder Board-Component View 1</p>	 <p>A close-up photograph of a green PCB component soldered onto a board. The component is positioned on a blue textured surface. A black ruler with white markings is placed vertically on the left side of the component for scale. The ruler shows measurements in millimeters, with markings every 10 units and sub-markings every 2 units. The component has several gold-colored solder joints and some printed text, including "2019/4/3" and "TJ040210_8R3266_T2H1".</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue perforated metal solder mask. The component is positioned on a black surface with a white metric ruler for scale. The ruler shows markings from 0 to 100 millimeters. The component is approximately 15 mm long and 5 mm wide. It features several surface-mounted components, including a microcontroller, a USB connector, and various passive components like resistors and capacitors.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph showing a small circular component mounted on a blue perforated metal solder mask. The component is positioned on a black surface with a white metric ruler for scale. The ruler shows markings from 0 to 100 millimeters. The component is approximately 10 mm in diameter. It features several surface-mounted components, including a microcontroller, a USB connector, and various passive components like resistors and capacitors.
