

Bicycle camera

B1

User manual

1.Step 1: Install App on your phone

(1)Android phone : search the **WBVR** at the googleplay ,then install it.

(2)IOS phone search the **WBVR-Bikesafe** at the

Apple store ,then install it .

2.Step 2 : Using phone to connect WiFi

1. Make sure you have insert SD card to camera and turn on camera (the WiFi is always on,you can see the yellow light)

2.Search the WiFi and connect it :

3.Find the WiFi name: **WBVR******(For example ,**WBVR_14F82D**),the initial password is :**99999999** .

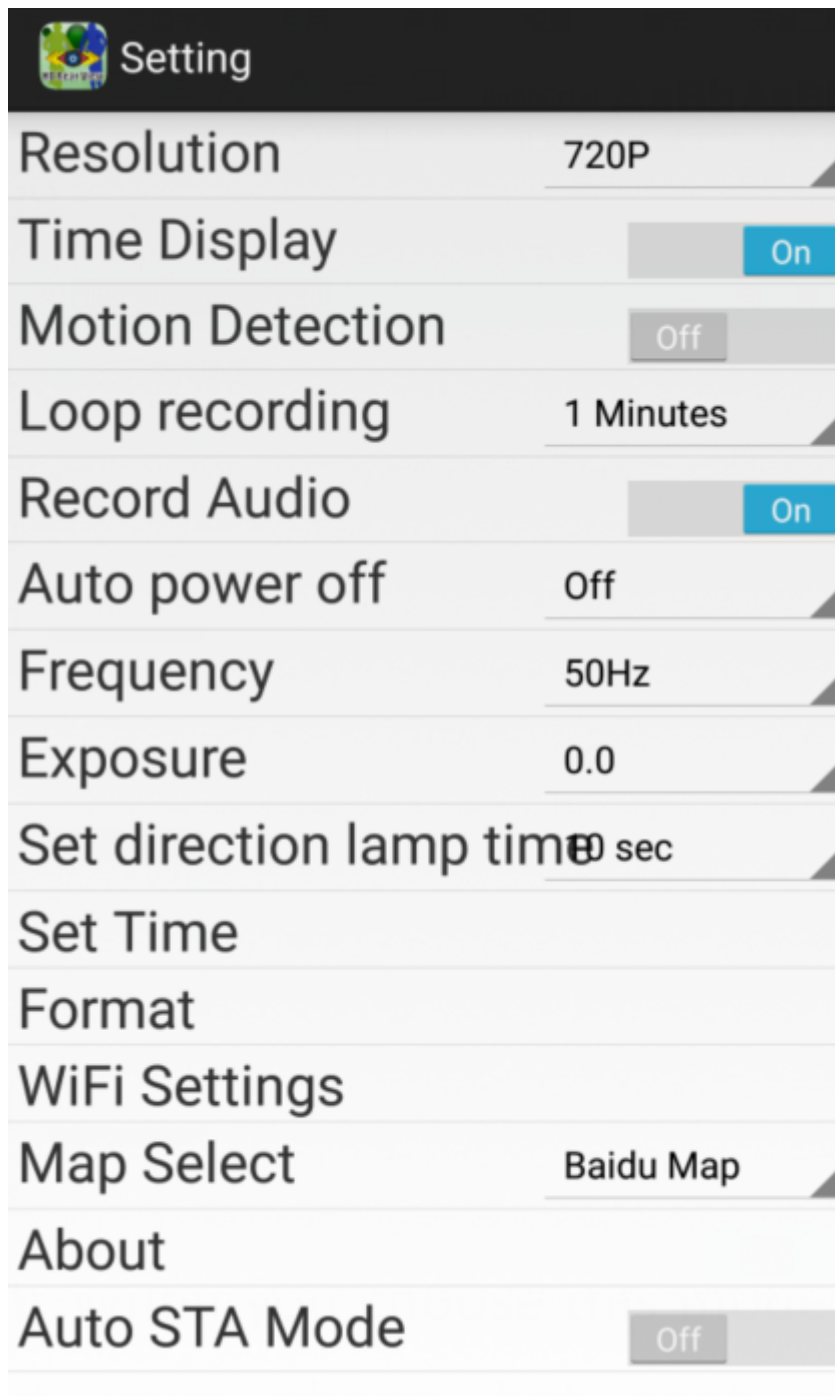

4.Successful connection

3. Step 3 : Enter the APP

At the Setup menu , there is a **Auto STA on/off**

Default is off , at this mode you can not use the 4G

LTE .

If you turn on **Auto STA** , you will see two options for the WiFi operate mode in App

1.Hot spot :When you choose this mode ,then you need input your phone hot spot name and

password ,then confirm it . The WiFi will switch to your phone hot spot , then you can use your 4G network at the same time .

2.Peer to peer : choose this mode , you can not use the 4G network at the same time .

After you have set the Hot spot mode, click the rear view ,

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by

turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body, This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
