MODEL DESCRIPTION AND DIFFERENCE

The model of MLU100-C series Intelligent Processing Card description

MLU100-C series are Intelligent Processing Card. They contain two models as follows. The MLU100-C3 has 8GB DDR memory and the MLU100-C4 has 16GB DDR memory.

We   __Cambricon Technologies Corporation Limited__   . hereby declare that the layout of PCB in the MLU100-C series are same, and the size are same too, the only difference is the memory capacity of DDR.

We'll be responsible for any consequences caused by other differences in the MLU100-C series.
