Download App

****Before setup, make sure your mobile device is connected to a wifi (2.4GHz network)****

1. Android device:
   Download "Tuya Smart" from Google play store
2. iOS device:
   Download "Tuya Smart" from APP store.

TuyaSmart

Register and login

1. Open the Tuya Smart app and set up an account unique and personal to you and follow prompts within the app.

Add Device

1. Plug the provided usb cable into the charging port of the camera.
2. After 30 seconds the camera will prompt "System set up", camera is now ready to be paired.
3. To add a device, select the "+" symbol at the top right of the app home page.
4. Select "Smart Camera".

Connecting the Device

There are 2 methods for connecting the device. Be sure your mobile device is connected to a wifi.
Method 1: QR Code

(1) Once device is added and the voice prompt is heard, press "next step" and enter Wifi password.

(2) Scan the QR code displayed with the smart camera, there will be a voice prompt "Succeed in scanning QR code" when successfully scanned.
(When scanning the QR code , be sure the lens is clear and hold the QR 20-30cm away from the camera lens.)
(3) Then click the button "Heard the beep", if connected successfully when you hear the voice prompt "Wifi connected.

Method 2: Smart Configuration

(1) Once device is added and the voice prompt is heard, press "otherwise" found in the top right hand corner.
(2) Then press "Smart Config" at the bottom of the list.
(3) Once selected press "Next step"

(4) Enter your Wifi password and press "Confirm".
(5) Camera is sucessfully connected when device prompts "Wifi connected".

Reset the camera if failed to connect to the wifi:
Press and hold the reset button on the camera for 6 seconds, there will be a voice prompt saying "Reset camera successfully". Now follow the connecting steps to connect your device.

Step 1:

Step 2:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
