Installation

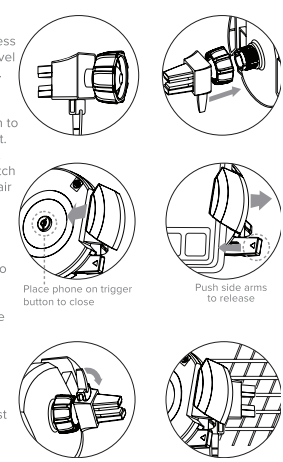

Step 1
Connect your air vent mount adapter to the wireless charging base by screwing the base onto the swivel ball and turning the twist lock clockwise to fasten.

Step 2
Flip the air vent lock switch to the upright position to open up the clip and place it on a suitable air vent. Adjust the charger to an optimal viewing position. When you have chosen your position, flip the switch to either to side 1 or 2 to close the clips onto the air vent blades. The charger is now secured.

Step 3
Mount the phone by placing it on the rubberized charging surface and gently pushing the phone to activate the trigger button to close the side arms. To dismount the phone simply press the release bars to open the side arms and remove the phone with ease.

Step 4
Use the Micro-USB charging cable included with your charger to connect the Wireless Charging Base and your vehicle's Car Charger*. For the best performance, a minimum of 10W is required from the car charger.

*Car Charger not included. Alogic Cannot guarantee the charging efficiency of your car charger in conjunction with the wireless charging car mount.

Quick Start Guide

Note

- Do not deliberately damage this product and put it in damp, direct sunlight or high temperature environment.
- If improper use, demolition or operation not according to the instructions result in any damage of your device or product, our company will not be liable for any compensation or maintenance responsibility.

Quick Start Guide

Introduction

ALOGIC Rapid Air Vent Mount Wireless Charger with Qi Technology is an easy to use car mount with wireless charging for Qi enabled smartphones. Designed for easy one-handed operation, the wireless charger lets you keep your eyes on the road, your phone charged and the GPS information available at a glance.

Specifications

Product Code	QC10RCMBK	
Input	Micro USB	
Output Power	Qi Wireless Charging	Wireless Output: 5W ,7.5W ,10W Max
	Input: 5V/2A 9V/1.67A	
Dimensions	101 x 73 x 83mm	
Compatibility	All Qi enabled devices	
Product Name	Wireless Charging RAPID Car Mount	
Frequency Band	114.50KHz to 177.50KHz	
Maximum Output Power	10W (Max)	
FCC ID	2ARVRCPS10	
Transmitter Power	21.77 dBuA/m@10m	

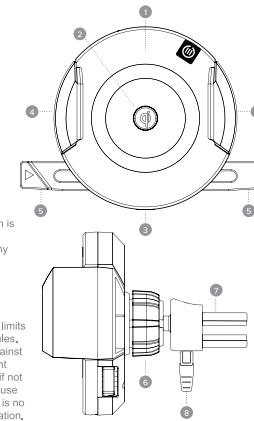

Features

- Designed for easy one-handed operation
- Let's you keep your eyes on the road, your phone charged and the GPS information available at a glance
- Easy-mount mechanism lets you mount or dismount the phone in seconds by a single-handed operation
- Simple to install with the option for being set up at any desirable angle or orientation
- Soft rubber padding on the charging surface provides enhanced protection to your phone when mounted
- Equipped with Strong, Elastic & Slip-proof Clips, the charger can be securely mounted on the car air vent
- Compatible with most of the current smartphones of varying sizes
- Qi certified to meet and exceed all safety and performance requirements
- Warranty: 1 Year

Package Contents

- Wireless Charging Car Mount x 1
- 1m Micro USB cable x 1
- User Manual x 1

Physical Layout

- Wireless Charging Pad
- Trigger Button
- Micro USB Power Input Port
- Phone Holder Side Arms
- Release Bars
- Swivel Fastener
- Air Vent Clips
- Air Vent Clamp Switch

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
