Description

Name: Smart Desktop Heater
Voltage: 110V(100V–127V)
Size: 220*100*131mm

Model: PN500
Power: 500W
Weight: 818g

- * Portable and Compact Mini Size Design
- * Apply Flame Retardant Material for Body
- * Double Fan Devices with Noiseless Features
- * Built-in Auto Shutoff Switch while Tilt Over
- * Two Adjustable Heat Thermostat for High or Low options
- * Apply PTC Ceramic Heater for Safe and Low Consumption

Operation

Status Light

Orange light flicker: awaiting Wi-Fi connecting.

Orange light solid on: low mode/Wi-Fi connect normally.

Red light solid on: the heater is on the high mode.

Connection

Download the Smart Life App and install it on your smart phone (App downloading consumes a certain amount of traffic, it is better to use Wi-Fi)

Step 1 Open the Smart Life App, click “Register”, read and agree the Privacy Policy of Smart Life Platform, then input a legal phone number or E-mail and click Confirm.

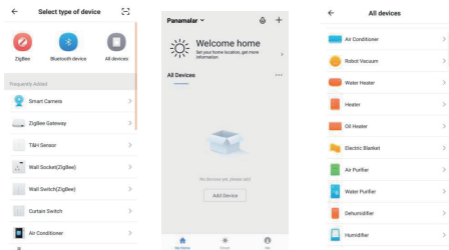

Step 2 Input Verification Code and create a password which is required a combination of numbers and letters, not less than 6 digits. Then login.

Note: Make sure your router, heater and mobile phone are nearby.

Process

Step 1 Open the Smart Life App, click “+” or “Add Device”, and choose “All devices”, select “Heater”.

Step 2 Long press the white thermostat button for about 5 seconds until the orange indicator turns to the fast flash mode. Select “Confirm indicator rapidly blink”.

[How to set the indicator or with a prompt tone](#)

next step

Step 3 Enter your Wi-Fi password for your phone and click “confirm”, wait until the process bar comes to 100%, that means device added successfully, click “Complete”.

Step 4 Now you can control your device like turn on or off, change the mode or current speed as you like, and can also set the schedule.

How to connect with amazon echo dot to control your desktop heater ?

- Step 1** Open the “Amazon Alexa” App, click “Home” button; Select “Skills” on the menu bar that pops up on the left.
- Step 2** Search “Smart Life” APP on the search box. Then click “Enable” to activate the App, and log in your account.
- Step 3** Click “Authorize” for the connection between Amazon Alexa and Smart Life App. Once the Smart Life App has been linked successfully , then back to “Home” interface.
- Step 4** Now you can use your amazon echo to voice control your Desktop Heater. Like “Alexa, turn on/off the heater”. You can also change the mode like say “Alexa, set the heater to level 1 (Low mode) or level 2 (High mode)”

Care and Maintenance

- * Clean the protective net regularly to avoid blockage.
- * Always shut down the power and unplug the plug before cleaning, and make sure the complete cool of unit before cleaning.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm from your body.
