Package Contents

Smart Label Printer *1

Label Paper Roll *1

USB Type-C Cable *1

Quick Start Guide *1

02

Installation

- 1 Tear off the seal on the label paper.

- 2 Press down the Paper Compartment Open Button to open the paper compartment.

- ③ Toggle the spindle to the “open” position as the arrow sign indicates.

- ④ Slide the paper compartment baffle to the correct scale according to the width of the paper roll and toggle the spindle towards the blade.
- ※ After adjusting the paper compartment scale, the spindle must be securely toggled to prevent any misaligned printing.

- 5 Fit the paper roll into the paper compartment and make sure the print side faces the print head. Pull a certain length of paper out from the paper exit and then close the paper compartment cover.
- ※ Distinguish the sides of the paper roll. It will not print if the paper roll is reversed.

03

Basic Functions and Settings

1. Power On

When the device is powered off (screen unlit), long-press the Power/Setting button for 2 seconds to power on the device and the monitor screen will display the home interface.

2. Feeding Paper

Press the Paper Exit/OK button and the device will roll out one stretch of paper.

3. Choosing Paper Types: Different Types of Paper Displayed Accordingly

 Crack Label: The seam of paper should be aligned to the cutting opening, tear the paper to have it cut by the blade.

 Black Label: Tear the paper through the tear line without using the blade.

 Cont Labe: A full sheet of print paper and use the blade to have it cut at any position.

 TRN Label: A type of transparent cont label; the seam of paper should be aligned to the cutting opening, tear the paper to have it cut by the blade.

4. Lack of Paper/Open Compartment

If the monitor screen displays information of Cover Open/Lack of Paper, the device will not respond to printing commands.

5. Low Battery

When the device is out of power, the monitor screen will display "The battery level is low. Please charge!" and will automatically power off in 10 seconds.

6. Bluetooth Connection

When the Bluetooth is connected, the Bluetooth icon will be displayed in inverted white.

7. Power Indicator

When the device is connected with a power adapter, the power icon will be displayed as follows.

8. Settings

Press Power/Settings button at the home interface to enter the settings interface; continue to press the Power/Settings button to switch among 5 different setting interfaces, including "Density"/"Type of Paper"/"Shutdown Time"/"Language"/"Self-check page". Press Paper Exit/OK button at the setting interface.

- 1) Printing density includes 5 levels (1/2/3/4/5).

- 2) Type of paper includes four types (crack label/black label/cont label/TRN label).

- 3) The shutdown time when no operation is performed on the device is set in 4 levels (15 minutes/30 minutes/60minutes/never).

4) Language is available in 2 types (Chinese/English).

5) Press the "Paper Exit/OK" button to print the self-check page. The self-check page will include information of printer model, firmware version, hardware version, device serial number, etc.

9. Printing

During the printing process, the monitor screen will display "Printing", and will automatically return to the home interface when the printing is completed. You can pause the printing with the phone APP or press the "Paper Exit/OK" button.

04

Installing App

Safety Precautions

Please read all the instructions and warnings in this manual carefully before using this product to ensure the proper functioning of the device and your safety.

*Warnings

Don't disassemble the product without authorization. Disassembled products cannot be returned or exchanged.

Do not wipe the product with corrosive chemicals or cleaning agents.

Do not use the product near places with flammable products such as gas stations or fuel depots.

1. Please keep the product and accessories out of the reach of children or they must be used under the supervision and guidance of a guardian;
2. Turn off the power immediately when water gets into the product;
3. Turn off the power immediately in case of any product malfunction;
4. If you want to use a power adapter, always use one that is safe, regulatory-compliant, and compatible;
5. Do not disassemble the product to replace the battery. Improper operation may cause an explosion;

6. The battery contains special protection circuit and device, please do not disassemble the battery without authorization, otherwise it may cause a short circuit or leakage. If electrolyte gets into your eyes, flush with water immediately and seek medical help;
7. Do not expose the product and the power adapter to high temperature or high humidity. Do not put them in water, otherwise a short circuit may occur and the battery may heat up, smoke, deform, damage, or even explode;
8. If smoke or smell comes from the product or the power adapter, please unplug the power adapter immediately and avoid any burns.

Related Statements

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Declaration of conformity

Hereby, Wuhan Jingchen Intelligent Identification Technology Co., Ltd. declares that this device is in compliance with the essential requirements and other relevant provisions of Radio Equipment Directive (RED) 2014/53/EU. This product can be used across EU member states. This device can be used in European Union.

Hereby, [Wuhan Jingchen Intelligent Identification Technology Co., Ltd.] declares that the radio equipment type [NIIMBOT D11] is in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following internet address: <http://www.niimbot.com>.

Canadian Statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) L'appareil ne doit pas produire de brouillage;
- (2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
