

To Whom It May Concern,

The ProMystic LLC Real Die, is approximately 19 mm wide at its widest and 19 mm tall. Due to its small and unique shape, the radio regulatory label (FCC) for this type of radio device does not fit on any surface of the product even at extremely small font.

The FCC has provided in KDB 784784 D01, Section 3, that instead of placing the labels onto the device, ProMystic LLC has elected to place the FCC ID onto the packaging of the device as well as in the printed user manual.

Thank you,  
Craig Filicetti  
Owner at ProMystic LLC
