1. Open the Charging Case

Open the charging case. Take out the headphones, and remove the insulation films on the headphones.

Insulation Film ---------- Insulation Film

2. Charging

Before the first use, put the headphones back into the charging case and close the charging case. Connect the micro-USB cable for charging.

FUNCL
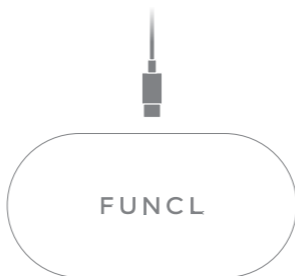

Charging the Headphones

When the battery level of the headphones is low, the indicators on the headphones will flash in red 3 times quickly every minute.

After putting the headphones into the charging case for charging, the headphone indicators will flash in red slowly, which indicates the headphones are put properly and being charged.

If a headphone indicator light doesn't flash in red, it means the corresponding headphone is put in the wrong place. Please take out the headphone and adjust it to a proper position.

The indicators on both the headphones and charging case will go off when the headphones are fully charged.

Charging Case Charging Status

When Charging the Headphones : After putting the headphones into the charging case, the charging case indicator light will flash in white. The flashing frequency shows the charging case battery level (max: flashing in 4 times; min: flashing in 1 time).

When Being Charged : The charging case indicator light will flash in white. The flashing frequency shows the charging case battery level (max: flashing in 4 times; min: flashing in 1 time). It will become a steady white light after fully charged.

3. Connect to the Device

First-Time Setup

1. When using the headphones for the first time, it is required to pair the left and right headphones. Please put the left and right headphones side by side. They will pair to each other automatically. After connected, the right indicator will go off and the left indicator will flash in white, which indicates they have entered the pairing mode.

2. Select and connect to "H18F" on the Bluetooth connection interface of your device.

Indicator Light

* If the wireless signals surrounding you are too strong, the Bluetooth connection might be affected, causing unstable headphone connection. If this happens, it is suggested to reset the connection or move to other places.

Automatic Reconnection

Once the pairing is finished, the headphones will automatically get on and connect to the device last set up after taken out from the charging case.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
    Reorient or relocate the receiving antenna.
    Increase the separation between the equipment and receiver.
    Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
    Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
