**FCC ID: 2AS4MHNJ-350E**

Gentlemen:

1. An antenna with a low gain value is added from the existing antenna.
2. Add a derivative HnJ-350K that removes the low frequency function from the existing appearance. Electrical and circuitic configurations are exactly the same, with only simple functions removed.
3. The name of the applicant has been changed to change the trade name.  
Changes to.Furun Medical Co.,Ltd. -> FurunHealthcare Co., Ltd.

Sincerely,

---

Byoung mo Kang / CEO
