

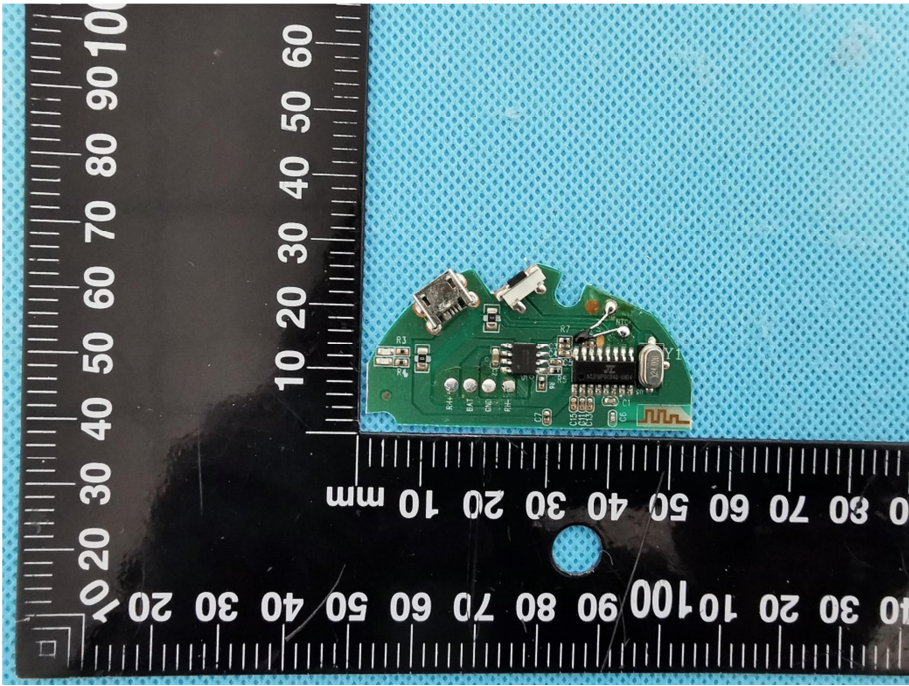

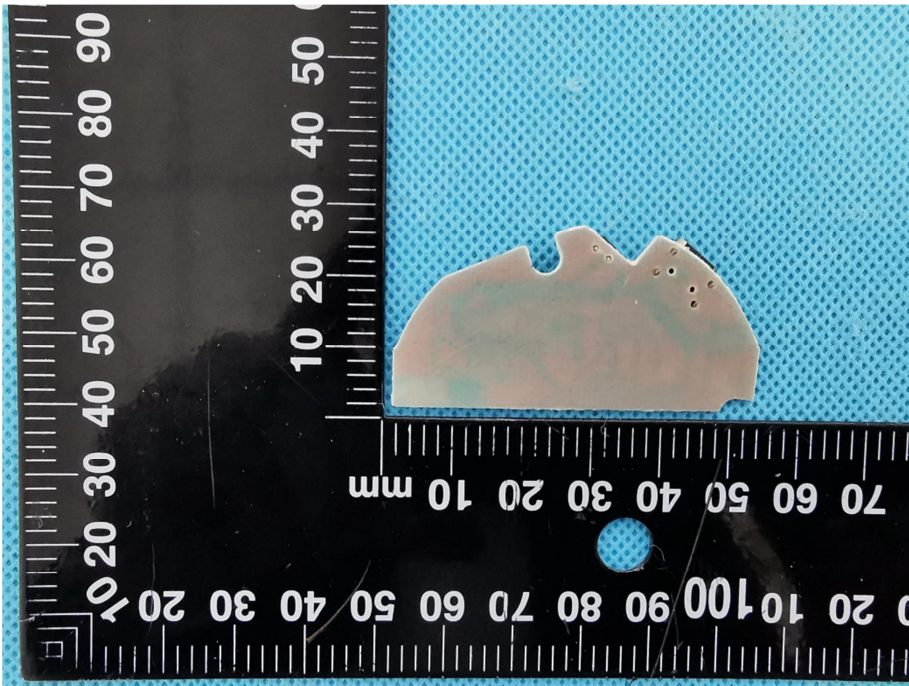

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

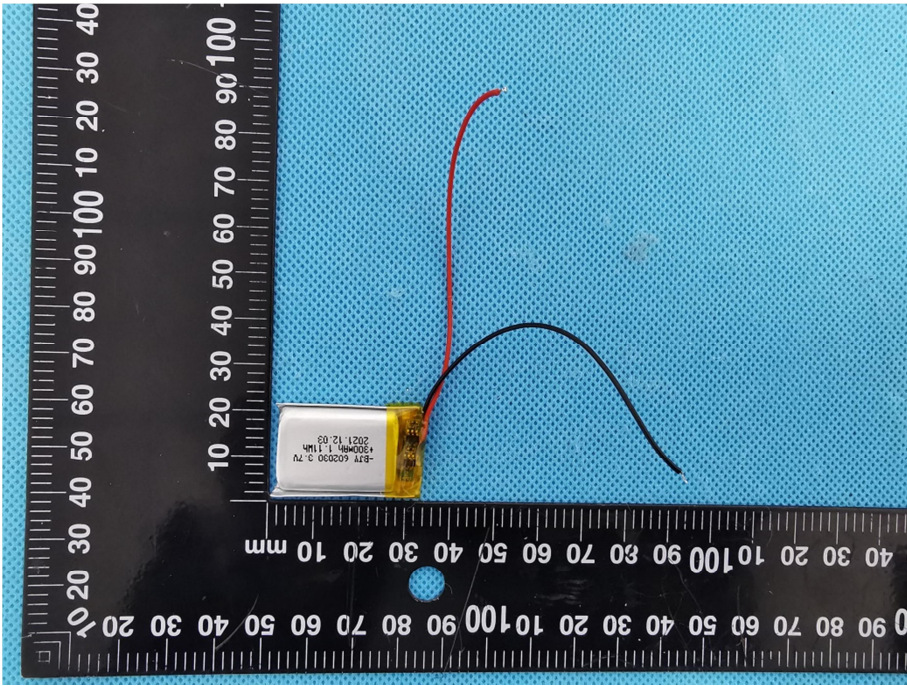

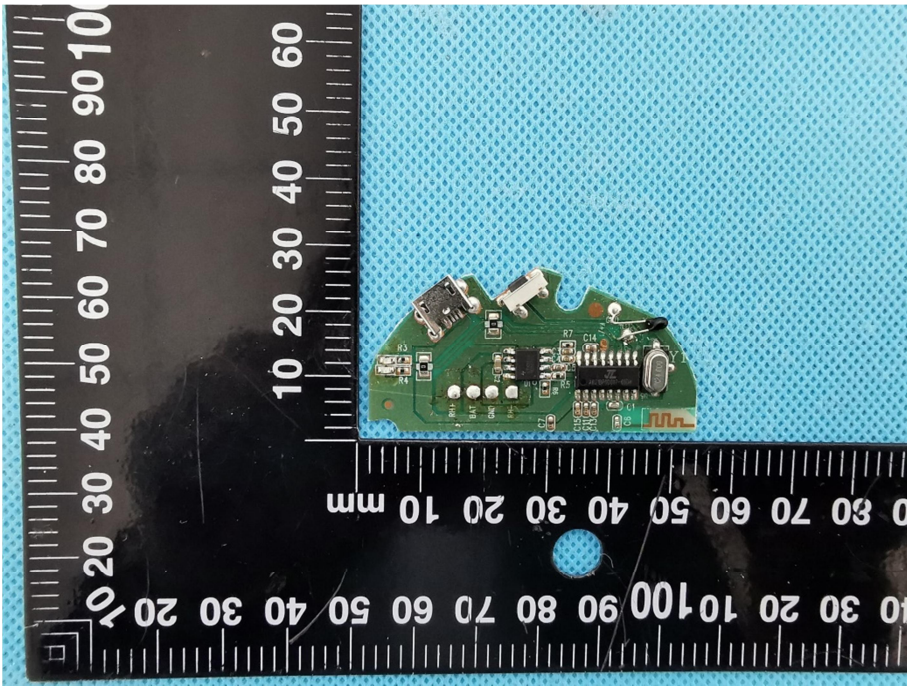

**EUT Housing and Board
View 1**

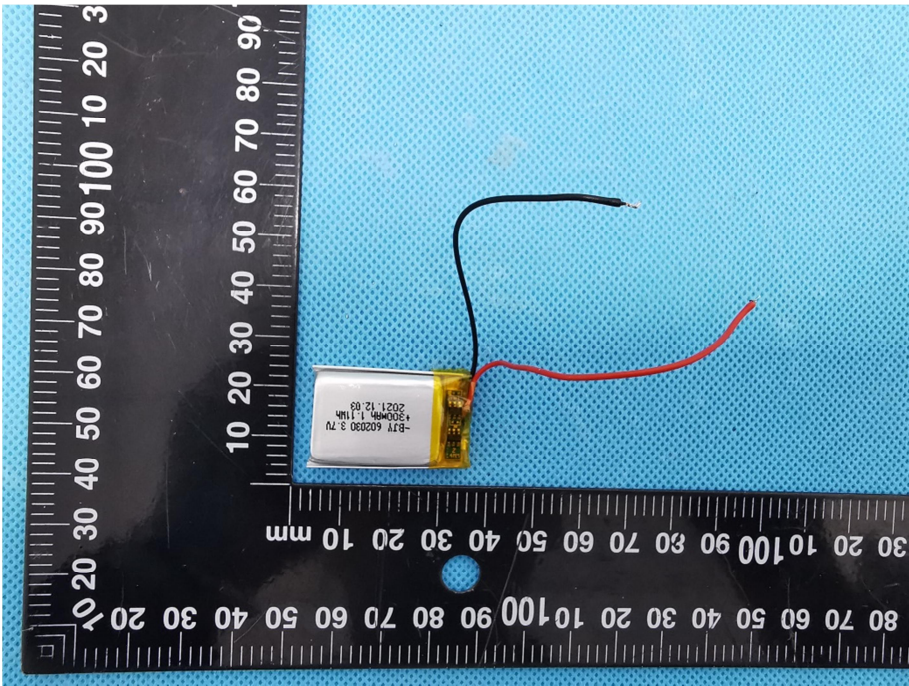

**EUT Housing and Board
View 2**

<p style="text-align: center;">Solder Board-Component View 1</p>	 A photograph showing a small green printed circuit board (PCB) component with various electronic components (resistors, capacitors, and a microchip) mounted on it. The component is placed on a blue perforated surface. A black ruler with white markings is positioned to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is approximately 25 mm wide and 15 mm high.
<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph showing the same PCB component as in View 1, but with the solder mask removed, revealing the underlying copper traces and pads. The component is placed on the same blue perforated surface. A black ruler with white markings is positioned to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is approximately 25 mm wide and 15 mm high.

<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph showing a small, rectangular silver component with a yellow solder mask, likely a battery, placed on a blue perforated surface. Two wires, one red and one black, are attached to the component. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph showing a green printed circuit board (PCB) component with various electronic components, including a microcontroller, capacitors, and a battery. The component is placed on a blue perforated surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.

<p style="text-align: center;">Solder Board-Component View 5</p>	 A photograph of a small, irregularly shaped metal component, likely a solder mask or stencil, placed on a blue perforated surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 40 mm and its width around 20 mm. The component has several small holes and a jagged edge.
<p style="text-align: center;">Solder Board-Component View 6</p>	 A photograph of a small, rectangular component, likely a battery or capacitor, placed on a blue perforated surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 30 mm and its width around 10 mm. The component has a white label with text: "3.7V 602030 3.7V", "1.1Ah", "2021.12.03", and "3249611144". Two wires, one black and one red, are attached to the component.
