Specification

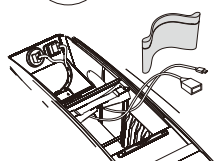

Product Name	Wireless Charger for Model X/S
Model	T-BOX
Input	5V $\overline{\text{DC}}$ 2A 9V $\overline{\text{DC}}$ 1.7A
Output	5W,7.5W,10W
Working Frequency	115KHz-143KHz
Charging Efficiency	>75%
Coil Quantity	3

Installation Steps

1. Remove the original Tesla black pad. Plug ④the Cigarette Lighter Car Charger to the cigarette lighter port, plug one side of ②the Micro USB Cable to one port of the Cigarette Lighter, and plug the one side of ③Extension USB Cable to one of Tesla original USB ports(Data port for USB thumb drive).

2. The two USB cables run from below to the other side, and remove the Tesla cup holders from center console.

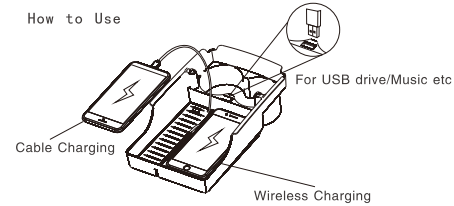

3. Plug ②the Micro USB Cable to the wireless charging port of T-Box and plug ③the extension USB Cable to the wire charging port of T-Box.

4. Place the T-Box to the center console and place the anti-slip mats on the T-Box, then you can use it now.

How to Use

FCC ID : 2A55P-T-B0X

FCC WARNING : This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC' s RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15cm surrounding the device and 20cm above the top surface of the device must be respected.
