

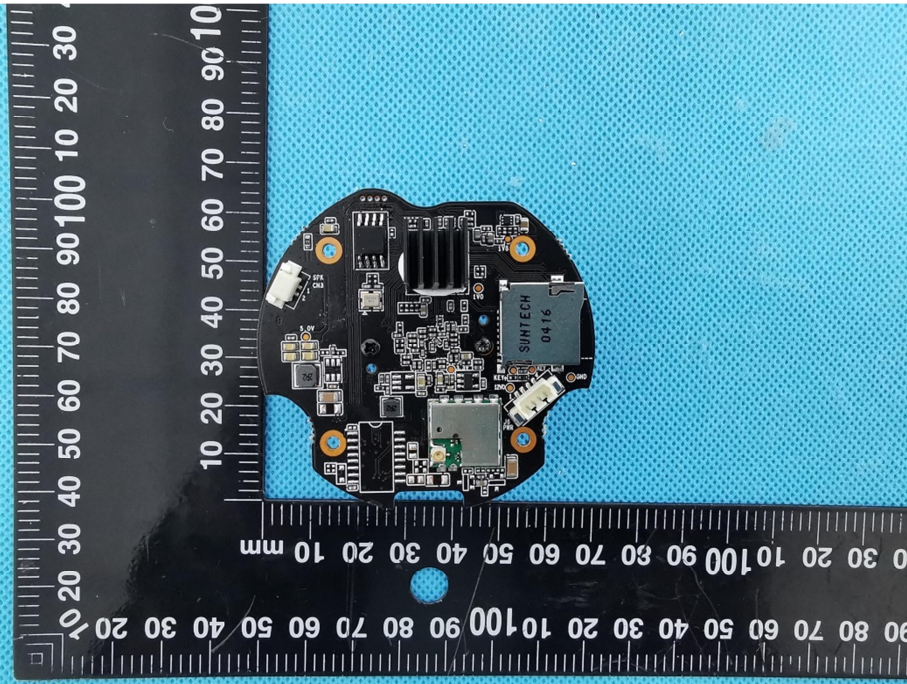

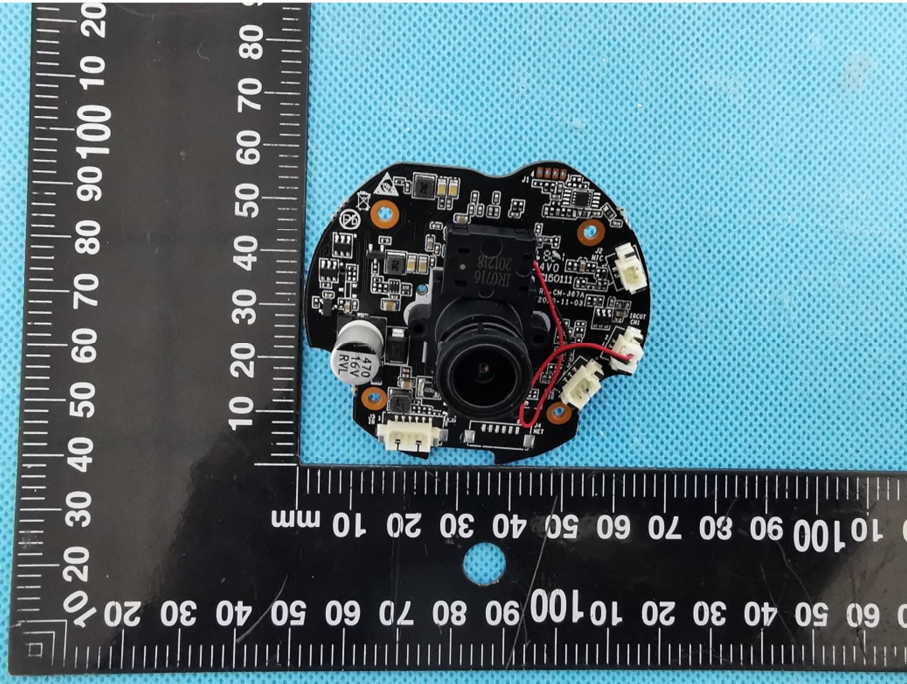

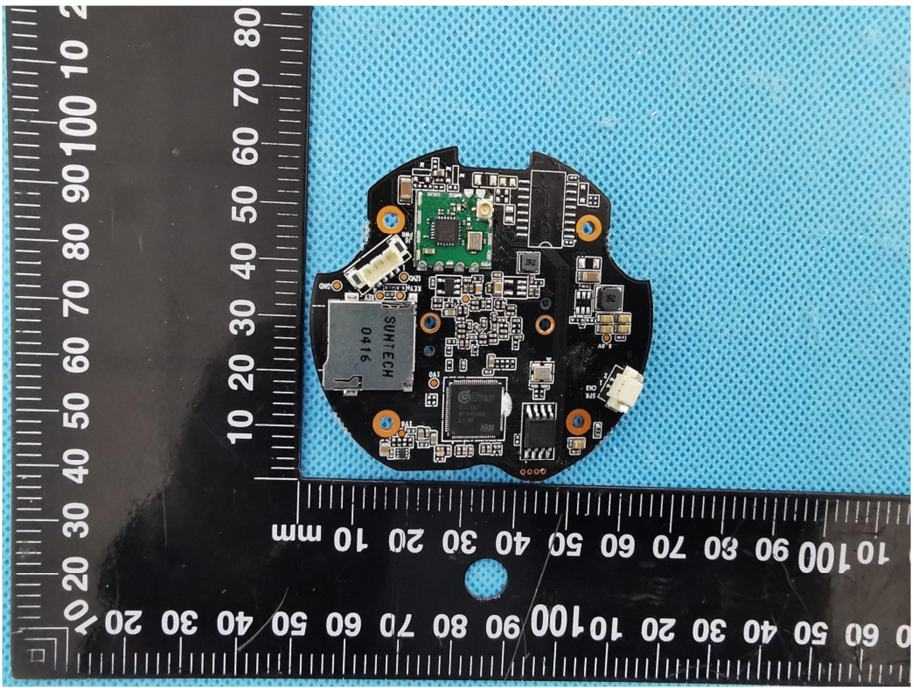

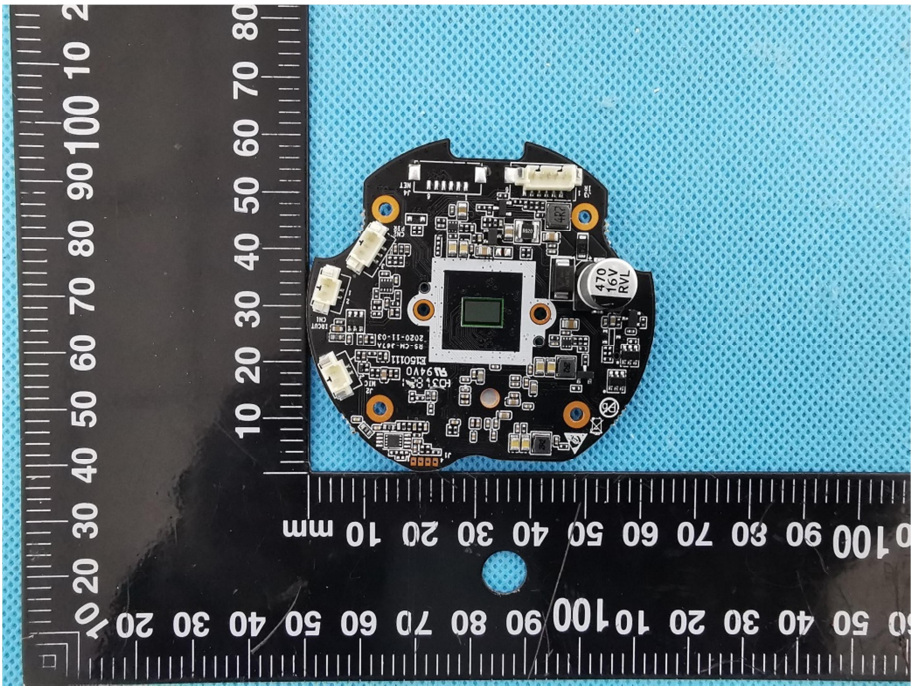

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	
<p>EUT Housing and Board View 2</p>	

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph of a circular printed circuit board (PCB) component, likely a camera module, shown from a top-down perspective. The board is black and populated with various electronic components, including a central lens assembly, several integrated circuits, and surface-mount components. A ruler is placed horizontally below the board for scale, showing markings from 0 to 100 mm. The board is positioned on a blue textured surface.</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of the same circular PCB component, shown from a bottom-up perspective. This view clearly shows the lens assembly and the underlying electronic components. A ruler is placed horizontally below the board for scale, showing markings from 0 to 100 mm. The board is positioned on a blue textured surface.</p>

<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a circular printed circuit board (PCB) component, labeled 'Solder Board-Component View 3'. The board is black and populated with various electronic components, including a central microcontroller, several integrated circuits, and surface-mount components. A prominent component on the left is a battery labeled 'SUNTECH 0-416'. The board is placed on a blue textured surface. A black ruler with white markings is positioned around the board for scale, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of the same circular PCB component, labeled 'Solder Board-Component View 4'. This view shows the board from a different angle, highlighting a large square component in the center, possibly a camera sensor or a specialized microcontroller. A cylindrical component labeled '470 50V R1V' is visible on the right side. The board is placed on a blue textured surface. A black ruler with white markings is positioned around the board for scale, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
