15.21

Notes

If the manufacturer does not have a radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.

2. Increase the separation between the equipment and receiver.

3. Connect the equipment into a circuit different than that to which the receiver is connected.

4. Consult the dealer or an experienced radio/television technician for help.
