

<p>Solder Board-Component View 7</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'View 7'. The board is populated with several electronic components, including a large black electrolytic capacitor, a smaller capacitor, a resistor, and a microcontroller. A prominent feature is a large, circular, gold-colored heat sink or thermal pad. The board is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The ruler shows dimensions of approximately 100 mm by 100 mm.
<p>Solder Board-Component View 8</p>	 A photograph of the same green PCB component, labeled 'View 8', showing the reverse side. The board is populated with various components, including a microcontroller, several resistors, and capacitors. A large, circular, gold-colored heat sink is visible on the left side. The board is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters, similar to the one in View 7.

<p>Solder Board-Component View 13</p>	 A photograph of a green printed circuit board (PCB) component. The board is populated with several integrated circuits, including a large square chip in the center and several smaller rectangular chips. It also features a blue USB connector and two white connectors. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler shows measurements in millimeters, with the horizontal scale from 0 to 100 mm and the vertical scale from 0 to 80 mm.
<p>Solder Board-Component View 14</p>	 A photograph of a red PCB component connected to a circular antenna. The antenna is a spiral-shaped inductor with a yellow wire loop at its center. The red PCB has various components, including a USB connector and a microcontroller. The assembly is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler shows measurements in millimeters, with the horizontal scale from 0 to 100 mm and the vertical scale from 0 to 70 mm.
