One-Year Limited Warranty

Subject to the conditions of this limited warranty, Shenzhen Foxwell Technology Co., Ltd ("FOXWELL") warrants its customer that this product is free of defects in material and workmanship at the time of its original purchase for a subsequent period of one (1) year.

In the event this product fails to operate under normal use, during the warranty period, due to defects in materials and workmanship, FOXWELL will, at its sole option, either repair or replace the product in accordance with the terms and conditions stipulated herein.

Terms and Conditions

1 If FOXWELL repairs or replaces the product, the repaired or replaced product shall be warranted for the remaining time of the original warranty period. No charge will be made to the customer for replacement parts or labor charges incurred by FOXWELL in repairing or replacing the defective parts.

2 The customer shall have no coverage or benefits under this limited warranty if any of the following conditions are applicable:

a) The product has been subjected to abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized repair, misuse, neglect abuse, accident, alteration, improper installation, or other acts which are not the fault of FOXWELL, including damage caused by shipping.

b) The Product has been damaged from external causes such as collision with an object, or from fire, flooding, sand, dirt, windstorm, lightning, earthquake or damage from exposure to weather conditions, an Act of God, or battery leakage, theft, blown fuse, improper use of any electrical source, or the product was used in combination or connection with other product, attachments, supplies or consumables not manufactured or distributed by FOXWELL.

2

3 The customer shall bear the cost of shipping the product to FOXWELL. And FOXWELL shall bear the cost of shipping the product back to the customer after the completion of service under this limited warranty.

4 FOXWELL does not warrant uninterrupted or error-free operation of the product. If a problem develops during the limited warranty period, the consumer shall take the following step-by-step procedure:

a) The customer shall return the product to the place of purchase for repair or replacement processing, contact your local FOXWELL distributor or visit our website www.foxwelltech.com to get further information.

b) The customer shall include a return address, daytime phone number and/or fax number, complete description of the problem and original invoice specifying date of purchase and serial number.

c) The customer will be billed for any parts or labor charges not covered by this limited warranty.

d) FOXWELL will repair the Product under the limited warranty within 30 days after receipt of the product. If FOXWELL cannot perform repairs covered under this limited warranty within 30 days, or after a reasonable number of attempts to repair the same defect, FOXWELL at its option, will provide a replacement product or refund the purchase price of the product less a reasonable amount for usage.

e) If the product is returned during the limited warranty period, but the problem with the product is not covered under the terms and conditions of this limited warranty, the customer will be notified and given an estimate of the charges the customer must pay to have the product repaired, with all shipping charges billed to the customer. If the estimate is refused, the product will be returned freight collect. If the product is returned after the expiration of the limited warranty period, FOXWELL' normal service policies shall apply and the customer will be responsible for all shipping charges.

5 ANY IMPLIED WARRANTY OF MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE OR USE, SHALL BE LIMITED TO THE DURATION OF THE FOREGOING LIMITED WRITTEN WARRANTY. OTHERWISE, THE FOREGOING LIMITED WARRANTY IS THE CONSUMER'S SOLE AND EXCLUSIVE REMEDY AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. FOXWELL SHALL NOT BE LIABLE FOR SPECIAL, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO LOSS OF ANTICIPATED BENEFITS OR PROFITS, LOSS OF SAVINGS OR REVENUE, LOSS OF DATA, PUNITIVE DAMAGES, LOSS OF USE OF THE PRODUCT OR ANY ASSOCIATED EQUIPMENT, COST OF CAPITAL, COST OF ANY SUBSTITUTE EQUIPMENT OR FACILITIES, DOWNTIME, THE CLAIMS OF ANY THIRD PARTIES, INCLUDING CUSTOMERS, AND INJURY TO PROPERTY, RESULTING FROM THE PURC HASE OR USE OF THE PRODUCT OR ARISING FROM BREACH OF THE WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, STRICT TORT, OR ANY OTHER LEGAL OR EQUITABLE THEORY, EVEN IF FOXWELL KNEW OF THE LIKELIHOOD OF SUCH DAMAGES. FOXWELL SHALL NOT BE LIABLE FOR DELAY IN RENDERING SERVICE UNDER THE LIMITED WARRANTY, OR LOSS OF USE DURING THE PERIOD THAT THE PRODUCT IS BEING REPAIRED.

6. Some states do not allow limitation of how long an implied warranty lasts, so the one-year warranty limitation may not apply to you (the Consumer). Some states do not allow the exclusion or limitation of incidental and consequential damages, so certain of the above limitations or exclusions may not apply to you (the Consumer). This limited warranty gives the Consumer specific legal rights and the Consumer may also have other rights which vary from state to state.

Safety Information

For your own safety and the safety of others, and to prevent damage to the equipment and vehicles, read this manual thoroughly before operating your tool. The safety messages presented below and throughout this user's manual are reminders to the operator to exercise extreme care when using this device. Always refer to and follow safety messages and test procedures provided by vehicle manufacturer. Read, understand and follow all safety messages and instructions in this manual.

Safety Message Conventions Used

We provide safety messages to help prevent personal injury and equipment damage. Below are signal words we used to indicate the hazard level in a condition.

🛦 DANGER

Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury to the operator or to bystanders.

Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury to the operator or to bystanders.

Indicates a potentially hazardous situation which, if not avoided, may result in moderate or minor injury to the operator or to bystanders.

Important Safety Instructions

And always use your tool as described in the user's manual, and follow all safety messages.

• Do not route the test cable in a manner that would interfere with driving controls.

• Do not exceed voltage limits between inputs specified in this user's manual.

• Always wear ANSI approved goggles to protect your eyes from propelled objects as well as hot or caustic liquids.

• Fuel, oil vapors, hot steam, hot toxic exhaust gases, acid, refrigerant and other debris produced by a malfunction engine can cause serious injury or death. Do not use the tool in areas where explosive vapor may collect, such as in below-ground pits, confined areas, or areas that are less than 18 inches (45 cm) above the floor.

• Do not smoke, strike a match, or cause a spark near the vehicle while testing and keep all sparks, heated items and open flames away from the battery and fuel / fuel vapors as they are highly flammable.

• Keep a dry chemical fire extinguisher suitable for gasoline, chemical and electrical fires in work area.

• Always be aware of rotating parts that move at high speed when an engine is running and keep a safe distance from these parts as well as other potentially moving objects to avoid serious injury.

• Do not touch engine components that get very hot when an engine is running to avoid severe burns.

• Block drive wheels before testing with engine running. Put the transmission in park (for automatic transmission) or neutral (for manual transmission). And never leave a running engine unattended.

• Do not wear jewelry or loose fitting clothing when working on engine.

1 Using This Manual

We provide tool usage instructions in this manual. Below are the conventions we used in the manual.

1.1 Bold Text

Bold text is used to highlight selectable items such as buttons and menu options.

Example:

Press the ENTER button to select.

1.2 Symbols and Icons

1.2.1 Solid Spot

Operation tips and lists that apply to specific tool are introduced by a solid spot $\bullet.$

Example:

When System Setup is selected, a menu that lists all available options displays. Menu options include:

- Languages
- Display Mode
- Unit
- User Information
- Resetting

1.2.2 Arrow Icon

An arrow icon indicates a procedure.

Example:

► To connect to wall plug:

- 1. Connect the 5V power adapter to scanner and plug it to the wall socket.
- 2. Press the power switch of the scan tool to power it on; meanwhile the

scanner tool starts charging automatically also.

1.2.3 Note and Important Message

Note

A NOTE provides helpful information such as additional explanations, tips, and comments.

Example:

NOTE

Test results do not necessarily indicate a faulty component or system.

Important

IMPORTANT indicates a situation which, if not avoided, may result in damage to the test equipment or vehicle.

Example:

IMPORTANT

Do not soak scanner as water might find its way into the scanner.

2 Introduction

i70 is a brand new automotive diagnostic tool based on the latest Android system. It inherits the same Foxwell advantages in car diagnostics, such as multi manufacturer coverage and OE-level diagnosis.i70 is the perfect tool for the busy garage or workshop, who needs the latest technology at unbeatable vaule.

2.1 Scanner Descriptions

This section illustrates external features, ports and connectors of the scanner.

- 1 7" LED IPS Capacitive Touch Screen shows menus, test results and operation tips.
- 2 Power Status Indicator indicates the power status of the scanner.

Figure 2-3 Top View

- 4 Diagnostic Port provides connection between vehicle and the scanner.
- **5 DC Power Input Jack** connects to wall plug to provide power to the scanner and to charge the scanner.
- 6 USB Port provides a USB connection for the PC or laptop.
- **7 Power Switch** turns on the scanner, goes to sleep mode or wake up the scanner from sleep mode, press and hold for 3 seconds for emergency shutdown.

8 Rear-Facing Camera - takes pictures of VIN number, faulty parts and plates and shoots test videos.

IMPORTANT

Do not use solvents such as alcohol to clean display. Use a mild nonabrasive detergent and a soft cotton cloth.

2.2 Accessories

This section lists the accessories that go with the scanner. If you find any of the following items missing from your package, contact your local dealer for assistance.

Item	Item
Main Unit	OBDII Adapter
DB15 Data Cable	Mazda 17 Pin Adapter
AC/DC Power Supply	Toyota 17 Pin Adapter

Table 2-2 Technical Specifications

3 Getting Started

This section describes how to power on/down the scanner, provides brief introductions of applications loaded on the scanner and display screen layout of the scan tool.

3.1 Powering up the Scanner

Before using the i70 applications (including updating the scanner), please make sure to provide power to the scanner.

The unit operates on any of the following sources:

- Internal Battery Pack
- 5V AC/DC Power Supply

3.1.1 Internal Battery Pack

The tablet scanner can be powered with the internal rechargeable battery. The fully charged battery is capable of providing power for 4 hours of continuous operation.

NOTE

Please turn off the tablet to save power when not use.

3.1.2 5V AC/DC Power Supply

The scan tool can also be powered from a wall socket using the AC/DC power supply. The AC/DC power supply also powers the internal battery pack charging.

To connect to wall plug:

1. Connect the 5V power adapter to scanner and plug it to the wall socket.

2. Press the power switch of the scan tool to power it on; meanwhile the

scanner tool starts charging automatically also.

3.2 Shutting Down the Scanner

All vehicle communication must be terminated before shutting down the scanner.Forcing a shut down while communicating may lead to ECM problems on some vehicles. Exit the Diagnostic application before powering down.

- To shut down the scanner:
 - 1. Press and hold the Power button of the scanner for 5 seconds.
 - 2. Then click Power off option showing on the menu to shutdown.

3.3 Screen Layout of Home Screen

When the scan tool boots up, press the Desktop tab from the Home screen of the tablet. Then press the i70 desktop icon to launch the diagnostic application.

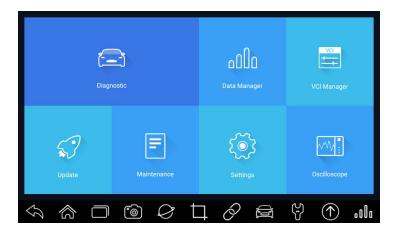

Figure 3-1Sample Home Screen

- 1.Application Buttons
- 2.Android Tool Bar

3.3.1 Application Buttons

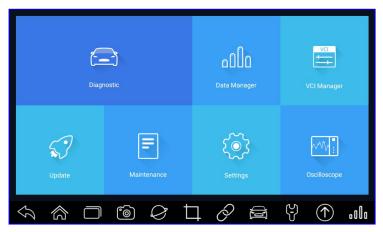

Figure 3-2 Sample Application Screen

This section briefly introduces the applications that are preloaded into the scanner:

- **Diagnostic** leads to test screens for diagnostic trouble code information, live datastream, ECU information, active tests, coding and other functions.
- Data Manager leads to screens for saved screenshots and pictures and playing back recorded live datastream, as well as stored logging data.

- •_Oscilloscope leads to oscilloscope OS100 software to perform electrical and electronic circuit tests.
- •_Videoscope leads to videoscope software connecting i70 to videoscope with an Imager head cable for close vehicle inspection.
- Update leads to screens for registration and updating of the scanner and managing your scanner serial numbers and sending us feedbacks about the scanner.
- **Setting** leads to screens for adjusting default settings to meet your own preference and view information about the scanner.
- About leads to screen of product information such as serial number and password, which is required for product registration.
- Customer Management leads to screens for logging and managing the client information of the workshop.
- **Remote Control** leads to the application TeamViewer for remote control when you need any support from Foxwell support team.
- Technical Data stores some guided operation information etc.

3.3.2 Android Toolbar

Operation of the buttons located on the bwlow bar are described in the table below:

Name	Button	Description
Exit	\mathcal{F}	Exits the Diagnostic application or exits a function.
Desk	\$	Back to the desk directly.
App Switch		Switch to the other application.
Camera	٦	Take a photo or picture.
Google Search	$\langle \rangle$	Search the fault codes online or other information.
Sceenshot	⊐	Capture the screens of errors or faults.
Frimware Update	Ô	Update the firmware of the tablet.
Dignostic		Go to Dignostic menu directly.
Maintenance	رک	Go to Maintenance function directly.
Software Update	(\uparrow)	Update the vehicle software directly.
Data Manager	• O O o	Manage the data or the picture you saved.

Table 3-1Title Bar

NOTE

In case of the display mode of i70 application is set to full screen display, the Android toolbar will not be displayed.

4 Diagnostic Operations

This section illustrates how to use the scanner to read and clear diagnostic trouble codes, view "live" data readings and ECU information on controllers installed, preform special functions such as actuation and coding, and perform vehicle services and maintenances on 145 vehicle brands.

4.1 Vehicle Identification

The vehicle identification information presented is provided by the ECM of the vehicle being tested. Therefore, certain attributes of the test vehicle must be entered into the scan tool to ensure the data displays correctly. The vehicle identification sequence is menu driven, you simply follow the screen prompts and make a series of choices. Each selection you make advances you to the next screen. A Back button in the upper left corner of the screen returns to the previous screen. Exact procedures may vary somewhat by vehicle.

It typically identifies a vehicle by any of the following means:

- VIN Scan Hotkey
- Automatic VIN aquisition
- Manual VIN entry
- Manual vehicle selection

NOTE

Not all identification options listed above are applicable to all vehicles. Available options may vary by vehicle manufacturer.

4.1.1 VIN Scan Hotkey

VIN Scan Hotkey button with on the title bar is a shortcut for Automatic

VIN Aquisition and Manual VIN input, which features the latest VIN-based Auto VIN Scan function to identify vehicles in just one touch and allows the technician to quickly detect vehicles and scan all systems. For some vehicles that do not support Auto VIN Scan function, choose Manually input VIN to let i70 to scan your vehicle.

TPMS mode config	urati				
	确定		取消		
[]	Ŷ V	0		d)	

Figure 4-11 Sample VIN Scan Hotkey

4.1.2 Automatic VIN Aquisition

Automatic VIN Acquisition allows to identify a vehicle by automatically requesting the vehicle identification number (VIN).

- To identify a vehicle automatic VIN acquisition:
 - 1. Select Diagnostic from the Home screen of the i70 application.

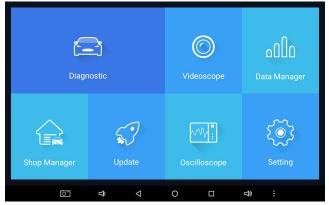

Figure 4-12 Sample Home Screen

2.A screen with vehicle manufacturers displays. Select the area where the vehicle manufacturer is from. A menu of all vehicle manufacturers from this area displays. Or tap the **Search Vehicle** box to input the vehicle brand to search.

Figure 4-15 Sample Vehicle Selection Screen

4. After the scan tool builds connection to the vehicle, the VIN number displays. If the Vehicle Specification or VIN code is correct, press the **OK** to continue. If it is incorrect, you are required to enter the correct VIN number manually.

4.1.3 Manual VIN Entry

Manual VIN Entry identifies a vehicle by manually inputting a 17-digit VIN code.

- To identify a vehicle by manual VIN entry:
 - 1.Refer to Step 1-3 of 4.1.2 Automatic VIN Acquisition.
 - 2.Press **Keyboard** button to input a valid VIN code and press **OK** to continue. The scan tool starts to identify the vehicle.

Figure 4-17 Sample Manual VIN Entry with Keyboard

4.1.4 Manual Vehicle Selection

Manual Vehicle Selection identifies a vehicle by making several selections according to certain VIN characters, such as model year, and engine type.

- To identify a vehicle by manual vehicle selection:
 - 1.Refer to Step 1-3 of 4.1.2 Automatic VIN Acquisition.
 - 2.On each screen that appears, select the correct option and then press the **OK** button. Do this until the complete vehicle information is entered and the menu of controller selection displays.

4.2 System Selection

When you have completed the identification of vehicle, a menu for selecting system to test displays. Menu options typically include:

- Auto Scan
- Control Unit

4.2.1 Auto Scan

Auto Scan performs an automatic system test to determine which control modules are installed on the vehicle and obtain diagnostic trouble codes (DTCs) overview. Depending on the number of control modules, it may take a few minutes to complete the test.

- To perform an automatic system scan:
 - 1. Press Auto Scan option to start.

4.3 Diagnostic Operations

After a system is selected and the scanner establishes communication with the vehicle, the Function Menu displays. Generally the menu options are:

- ECU Information
- Read Codes
- Freeze Frame Data
- Erase Codes
- Live Data

NOTE

Not all function options listed above are applicable to all vehicles. Available options may vary by the year, model, and make of the test vehicle. A "The selected mode is not supported!" message displays if the option is not applicable to the vehicle under test.

4.3.1 ECU Information

ECU Information screen displays the identification data of the control module under test, such as the control module identification string and the control module coding.

To read ECU information: 1.Press ECU Information from Select Diagnostic Function menu.

3. Press function key **Save** to store ECU information, and press **Print** to print the information. Or use the **ESC** button to exit.

4.3.2 Read Codes

Read Codes menu lets you read trouble codes found in the control unit. Typical menu options include:

- Present/Permanent/Current Codes
- Pending Codes
- History Codes
- Code History
- Self Diagnostic

Present/Permanent/Current codes stored in a control module are used to help identify the cause of a trouble or troubles with a vehicle. These codes have occurred a specific number of times and indicate a problem that requires repair. Pending codes are also referred to as maturing codes that indicate intermittent faults. If the fault does not occur within a certain number of drive cycles (depending on vehicle), the code clears from memory. If a fault occurs a specific number of times, the code matures into a DTC and the MIL illuminates or blinks.

History codes are also referred to as past codes that indicate intermittent DTCs that are not currently active. Code history is number of engine starts since the DTC(s) were first detected (to see if they are current or intermittent).

Self diagnostic lets you manually activate system tests that check for DTCs. Usually it includes a KOEO (Key-on, engine-off) test and a KOER (key-on, engine-running) test.

To read codes from a vehicle:

1. Press **Read Codes** from Select Diagnostic Function menu. A code list including code number and its description displays.

Figure 4-29 Sample Function menu screen

- 2. Slide up and down to view additional information when necessary.
- 3. Press **Save** to store DTC information, and press **Print** to print the code information. Or use the **ESC** button to exit.

4.3.3 Freeze Frame Data

Freeze Frame Data menu displays freeze frame data, a snapshot of critical vehicle operating conditions automatically recorded by the on-board computer at the time of the DTC set. It is a good function to help determine what caused the fault.

- To view freeze frame data:
 - 1.Select **Freeze Frame Data** from Select Diagnostic Function menu. Details of freeze frame data displays.
 - 2. Slide the screen up and down or use the **PAGE UP** and **PAGE DOWN** button to view additional information when necessary.

3. Press function key **Save** to store freeze frame information, and press **Print** to print the freeze frame data. Or use the **ESC** button to exit.

4.3.4 Erase Codes

Erase Codes menu lets you to clear all current and stored DTCs from a selected control module. Also it erases all temporary ECU information, including freeze frame. So make sure that the selected system are completely checked and serviced by technicians and no vital information will be lost before clearing codes.

NOTE

- To clear codes, make sure that the ignition key is switched to ON with the engine off.
- Erase Codes does not fix the problem that caused the fault! DTCs should only be erased after correcting the condition(s) that caused them.
- ▶ To clear codes:
 - 1. Press Erase Codes from Select Diagnostic Function menu.

DEMO V1.00.005	Â	¢	0	T	6

2.Follow the on-screen instructions and answer questions about the vehicle being tested to complete the procedure.

3. Check the codes again. If any codes remain, repeat the Erase Codes steps.

4.3.5 Live Data

Live Data menu lets you view real time PID data in text, plot and gauge formats, learn good sensor data and compare them with faulty data, and record live data from a selected vehicle electronic control module.

Menu options typically include:

- All Data
- Custom List

4.3.5.1 All Data

All Data menu lets you view all live PID data from a selected control module. i70 allows you to view live data information in 6 different types of display modes.

- **Text Mode** this is the default mode which displays the parameters in texts.
- **Graph Mode** displays the parameters in waveform graphs, giving you the 'real picture' of what's going on in the vehicle. You can view up to 4 parameter graphs simultaneously and easily find and zoom in on a particular string of data.
- Merged Graph Mode merges multiple PID plots into one coordinate, so you can easily see how they affect each other, providing you with the most comprehensive and functional look at live data possible.
- Guage Mode displays the parameters in the form of an analog meter.
- Study Mode gives you the ability to learn good live sensor data values during idle, KEKO, acceleration, deceleration, part load and heavy load on each vehicle comes into your shop and records them for future reference.
- Comparison Mode If that vehicle comes in is with a problem, you can easily compare the faulty sensor and parameter readings to the good readings, and you will be alarmed when a faulty sensor reading is detected.

NOTE

- Study and Comparison modes are available for viewing of parameter readings in text mode ONLY.
- In case no learned value is stored in the scan tool, the Comparison Mode will not be available.
- To view all live PID data:
- 1. Press **Live Data** from Select Diagnostic Function menu to display the live data menu.

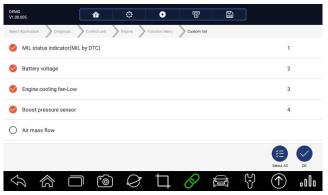

Figure 4-33 Sample Live Data Selection Screen

2.Press **All Data** from the menu to display the data stream screen. All readings will be displayed in text format by default.

Figure 4-35 Sample Live Data Screen

- 4. To move a data line to the top of Data List screen, just tap the line to select and then press the button **To Top**. To record live data to memory of the scanner for offline review, just tab the button **Record**, and press **Stop** to stop recording at any time. To print the data through computer, tap the **Print** icon.
- 5.To view live PID in graph format, press the tab **Graph**, and 4 PID plots display. To view another PID plot, tab the name of a plot and a list of available PIDs display. Select one from the dropdown box and the plot changes to the newly selected PID. To view the plots with more details, use the **Zoom in** button; instead, use the **Zoom out** button.

Figure 4-36 Sample PID Graph Screen

6. To see how the PIDs affect each other, press the **Graph Merge** tab to merge them into one coordinate for easy and intuitive diagnosis.

Figure 4-37 Sample Graph Merge Screen

4.3.5.2 Custom Data List

Custom Data List menu lets you to minimize the number of PIDs on the data list and focus on any suspicious or symptom-specific data parameters.

To create a custom data list:

1. Press **Custom List** from the menu to display all available parameters from the selected control module.

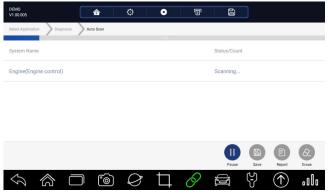

Figure 4-39 Sample Live Data Screen

2. The custom data stream selection screen displays. Tap the lines you wish to select.

NOTE

To deselect an item, tap the line again. Alternatively, tap **SELECT ALL** or **CLEAR ALL** to select or deselect all items at once.

3. Press the **OK** button to complete the selection, and all selected parameters display.

5 Bi-directional Test Operations

i70 allows you to use the scan tool temporarily to activate or control a vehicle system or component. With i70, the check of electronic components such as switches, sensors, relays, & actuators is made a simple task. It allows you to recalibrate, adapt or configure certain components after making repairs or replacement. It gives you the ability to 'flash' a control unit with new program data. Provided that a module can be re-coded, i70 allows for the coding and programming of a replacement control module or changing previously stored incorrect coding as expensive factory tools do. In addition, it lets you recode the transponder in a mechanical key or key fob. When a key for a modern vehicle is replaced, the new unit will often turn the mechanical switch but fail to initialize the system or start the vehicle. If this occurs, it is typically because the transponder inside the key has not been coded to that particular system.

5.1 Active Tests

Active Tests, also known as Actuator Tests, are bi-directional diagnostic tests on vehicle systems and component. The tests let you to use the scanner temporarily activate or control a vehicle system or component, and when you exit the test, the system/component returns to normal operation.

Some tests display a command to the operator. For example, if "Press Brake Pedal" displays, the operator has to press and hold the brake pedal and then continue. The sequence, number, and type of tests are dictated by the control module.

On some systems, the actuator tests cannot be restarted until the ignition key is switched off for some time. Alternatively, briefly start and run the engine, shut down, turn the ignition to the run position, then re-initiate the actuator tests.

IMPORTANT

The tests activate a component, but they do not check if the component is working correctly. Make sure the components to be tested are in good condition and correctly mounted.

NOTE

Available tests depend on the control module under test and the vehicle itself.

To start a test:

1. Press Active Test from the menu and a list of available options displays.

DEMO V1.00.005	合	Ō	•	1	6

Figure 5-1 Sample Active Test Screen

2. Select an option to start the test and live data of the selected test displays.

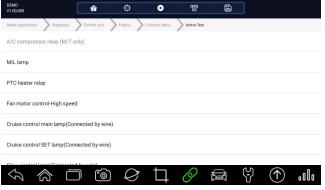

Figure 5-2 Sample Active Test Screen

- 3.Follow on-screen instructions to make proper selections and operations to complete the tests.
- 4. To exit the test, tap the **Back** button or the **Close** button at the top right of the screen.

- Before running any tests, always observe the safety instructions provided in this manual and the warnings provided by the vehicle manufacturer. In addition, follow any warnings and descriptions provided on the scanner screens.
- Never run the tests while the vehicle is moving.

5.2 Adaptation

Adaptation menu let you change adaptation values from the control module and allows you to alter certain values and/or settings in control modules that support it.

You should refer to the Service Manual for your particular car before attempting to use the Adaptation function.

- To set an adaptation:
 - 1. Select Adaptation from Function Menu and press the ENTER key.
 - 2. Follow on-screen instructions to make proper selections and operations to complete the tests.
 - 3. To exit the test, tap the **Close** button at the top right of the screen.

5.3 Coding and Programming

i70 allows for the coding and programming of a replacement control module or changing previously stored incorrect coding.

Coding also known as Teach-in Program or Component Adaptation. It is the process of selecting and activating one program for a specific vehicle from a set of programs that the factory installed in the control module. This allows one control module to be used for different models, countries, and emission applications.

Programming is the process of taking a blank control module and then adding the correct vehicle program to memory.

6 Service and Maintenance Operations

This section gives brief instructions of the most commonly required service and maintenance operations. Typical service operation screens are a series of menu driven executive commands. Follow on-screen instructions to complete the operation.

Available service and maintenance options include:

- Oil Light Reset
- EPB Service
- TPMS Programming Service

- ABS/SRS Services
- SAS Calibration
- DPF Regeneration

6.1 Oil Light Reset

Oil Light Reset menu allows you to reset the service lamps on the instrument cluster. The Service Indicator System is designed to alert the driver when the vehicle is due for a service.

Oil service reset methods are determined by the vehicle being tested. Depending on the vehicle being tested, any of the following means displays:

- Oil Reset With One Button
- Manual Reset
- Auto Reset

6.1.1 Oil Reset With One Button

Oil Reset With One Button is applicable to GM models only. It offers quick and simple oil service reset with the click of one button.

- ▶ To do Oil Reset With One Button on a year 2010 Chevrolet passenger car model:
 - 1.Scroll with up and down arrow keys to highlight Oil Life Reset from the Engine Control Module menu. An Information screen displays. Press the function key OK to continue or Cancel key to return to the Oil Reset menu.
 - 2.Follow on-screen instruction and send a command to reset oil service. A screen with "Success" message displays once the lamp has been reset. Press any key to return.

6.1.2 Manual Reset

Almost all Asian vehicles and most American and European vehicles have mechanical oil service indicator reset. The service tool does not have to communicate with the vehicle being tested, but guides you to complete the service manually by providing step-by-step on-screen instructions.

When Manual Reset is selected and the vehicle being tested identified, a procedure opens on the screen. Scroll with arrow keys to read the entire procedure and performing the necessary steps as directed by the on-screen instructions. The exact order of the test operation steps may vary depending on the test vehicle. Be sure to follow all on-screen instructions.

This manual reset procedure can be interrupted and aborted if the ignition key position is changed.

To do oil reset manually:

- 1.Enter vehicle information by certain VIN characters, such as model, and year to identify the vehicle being tested and press **OK** key to confirm. Select Engine Control Module and follow the on-screen menu to select Oil Life Reset.
- 2. When Oil Life Reset is selected, a procedure screen displays.
- 3. Follow all on-screen instructions to perform the manual mechanical reset.
- 4.Press **OK** key to return.

6.1.3 Auto Reset

Auto Reset is a bi-directional communication procedure directed by the service tool. The service tool displays guides for you through the process. A number of instructions that require a response to continue display, including an option to clear any stored codes once the interval has been reset. Follow the on-screen instructions.

6.2 Electronic Parking Brake (EPB) Service

EPB Service menu allows you to perform the service and maintenance of brake systems, including deactivation and activation of the brake control system, bleeding brake fluid, opening and closing brake pads, and setting brakes after disc or pad replacement, on multiple brands of vehicles where electronic brake systems are fitted.

Some tests display a command to the operator. For example, if "Pressing Brake Pedal" displays, the operator has to press and hold the brake pedal and then continue. Actual tests vary by vehicle manufacturer, year, make.

Typical special test options include:

- Deactivate/Activate SBC/EPB systems allows to deactivate brakes for further service or maintenance work on brake systems or activate brakes when service or maintenance work on brake systems are completed.
- Adaptation on Audi A8 allows to set new pad thickness of rear brakes calipers after changing brake discs & pads on Audi A8 models.
- Replace hydraulic brake systems fluid/bleed brake system on Mercedes SBC vehicles – allows to change brake fluid/bleed brake system.
- Perform service reset and service position on BMW EPB vehicles allows to do the CBS reset and CBS correction for front brake and rear brake.

- **Perform activation/service work on Volvo PBM vehicles** allows to perform installation check, applying parking brake, releasing parking brake, activating service mode and exiting service mode.
- Reset memory on Toyota EPB vehicles allows to clear the learned memory of the EPB ECU.
- Perform brake cable replacement and electric parking brake replacement allows to fit in or remove the brake cable safely, adjust brake cable's tension and calibrate the electric parking brake replacement.
- Save and write clutch pedal programming on Renault EPB vehicles allows to save clutch pedal programming on Renault vehicles fitted with manual gearbox. After this command is activated, the tool allows to "flash" the electric parking brake unit with the saved clutch data.
- Perform control function and reset function on Opel EPB vehicles allows to apply/release park brake cable service, provide park brake cable service replacement procedures and calibrate the parking brake systems after brake service.
- Sensor calibration on Honda EPB vehicles allows to program the current output value of each sensor into the electric parking brake unit.
- Provides parking brake unjam procedure and perform longitudinal accelerometer calibration on Land Rover EPB vehicles – allows to drive the electronic park brake so it is unjamed in the releasing direction and then drive it into mounting position or the latching position; also allows to perform longitudinal accelerometer calibration.

- EPB systems must be deactivated before carrying out any maintenance/service work on the brakes such as changing of pads, discs and calipers.
- Use proper tools to avoid the risk of body injuries of mechanics and technicians and damage to the brake system.
- Make sure the vehicle is properly blocked after deactivation of the systems.

6.3 Tire Pressure Monitoring System (TPMS)

Programming

TPMS Service menu allows you to check the tire sensor IDs from the vehicle ECU and to perform TPMS programming and reset after tires and/or TPM sensors are replaced and/or tires are rotated.

6.4 ABS/Airbag Services

ABS/Airbag Services menu let you use the scanner temporarily to activate or control anti-lock brake systems and air bags or components.

Typical test options include:

- ABS Manual Control Tests–allows to manually control the actuators in order to test ABS motors, solenoids, solenoid enable relays, EMBs, and more.
- ABS Motor Test-allows to manually control the ABS pump motor.
- ABS Version Test-displays the name of the brake system and the ABS controller version number, software ID, and sequence value.
- Actuator Tests–allows to manually control the actuators in order to test AYC valves, inlet valves, outlet valves, pump motors, and TRACS valves.
- Autobleed Test, Automated Bleed, or Service Bleed–removes air from the internal brake fluid chambers after servicing the brakes.

6.5 Steering Angle Sensor (SAS) Calibration

SAS Calibration menu let you perform calibration of the Steering Angle Sensor, which permanently stores the current steering wheel position as straight-ahead in the sensor EEPROM. On successful calibration of the sensor, its fault memory is automatically cleared.

6.6 Diesel Particulate Filter (DPF) Regeneration

DPF Regeneration menu let you perform the DPF cleaning to clear the blockage through continuous burning of the particulates captured in the DPF filter. When a DPF regeneration cycle is completed, the DPF light automatically goes off.

7 Data Manager

Data Manager menu let you review stored screenshots and playback recorded live data.

Typical menu options include:

- Image
- PDF
- Data Playback
- Data Record

	Data Manager	
	Image	>
Ł	PDF	>
	Data Playback	>
ľ	Data Record	>

Figure 7-1 Sample Data Management Screen

7.1 Browse Picture

Browse Picture option leads to screens for review of stored screenshots. In case a failure of the i70 applications occurs, please just take a screenshot and send it to our team to help with the troubleshooting of system faults.

7.1.1 How to Take a Screenshot

- To take a screenshot:
 - 1. If need save the data quickly, just press the **Camera** button at the title bar of the screen to take capture for later analysis.
 - 2.Add a description of the screenshot, and press the **OK** button to save.

7.1.2 Review Screenshot

- To review the screenshot:
 - 1. Press the **Data Management** icon from the Home screen of i70 diagnostic application.
 - 2.Press **Browse Picture** and all available pictures will be displayed as slideshow automatically.

Data Manager	
Image	>
PDF	>
Data Playback	>
Data Record	>

Figure 7-3 Sample Browse Picture Screen

- 3.To stop the slideshow playing, just press the **Pause** button. Use **Next** or **Previous** button to review the pictures one by one.
- 4.To delete a picture, tap button **Delete** and answer **Yes** to delete. Or press **Delete All** to delete all the pictures.

7.2 Playback Data

The Playback option leads to screens for review of recorded live data. Playing back a recording is just like using the scan tool on a live vehicle. It let you review live data in text, graph and graph merging format. Playback speed and direction (forward or reverse) can also be controlled.

To review recorded live data:

- 1. Press the **Data Management** icon from the Home screen of i70 diagnostic application.
- 2. Press **Playback** and all available records display.
- 3. Tap a record once and press the **OK** button or tap the record twice to review. All recorded parameters display in text format by default.

Figure 7-5 Sample Data Stream Playback Screen

- 4. To view parameter graphs, press the **Graph** tab. And to merge the graphs, press the tab **Graph Merging**.
- 5. To move forward or reverse back of the playing, just drag the progress bar forward or reverse. To stop the playing of live data, press the **Pause** button.
- 6. To exit playback, press the **Back** button.

7. To delete a record, tap a record to select and then press the **Delete** button. Answer **Yes** to delete or answer **No** to guit.

7.3 Data Logging & Stored Data Management

Data Logging is a tool to record the communication data between the scanner and the vehicle under test to help with troubleshooting of diagnostic failures. The logs will be saved to the tablet and sent to our server via internet.The logging icon 💽 displays on the upper right side of the diagnostic screen whenever the scanner builds communication with the vehicle.

To use Data Logging, the procedures is as below:

1. Click the data logging icon to start record the communication data between the tablet and the vehicle.

2. Please re-click the data logging icon when the data record is finished.

3. Fill in the information showing on the screen.

4.Click OK icon to upload the data to our server.

5.If failing to upload the data due to without network, please select Stored Data Management from Data Management and click the Upload button to send them to our server again when the network available.

After uploading a piece of record successfully, please send an e-mail to support@foxwelltech.com or submit a support ticket on our website with the serial number of your i70, the date the record is uploaded. and a brief description of the problem you have.We will get back to you with a solution.

8 Print Operations

The print functions of i70 enables the technicians printing the data and information conveniently for later analysis and diagnostic.

To print the data, the procedures as following:

1.Go to the detailed data page, there is a print icon on the left bottom side.

2.Click Print icon and choose the corresponding printer if connected with printer.

3.If not connected, save the file on your desk and print it out later.

4.Besides, you can click Save icon and review the data on **Playback** of **Data Management**.

9 Remote Control

Remote Control enables you to start TeamViewer for remote control when you need any supports from Foxwell support team.

If you need Foxwell support team to remote control i70, please do as follow:

1.Click the Remote Control icon on the main menu of i70 to start TeamViewer.

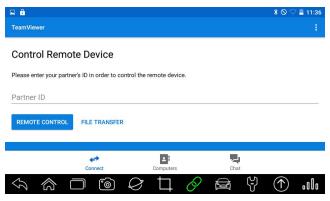

Figure 10-1 Sample Remote Control Screen

2.Send your ID and password to us to let our team to take control your tablet.

10 Setting

This section illustrates how to program the scanner to meet your specific needs.

When Setting application is selected, a menu with available service options displays. Menu options typically include:

- Language
- Display Mode
- Unit
- User Information
- Reset Setting

				ļ	_anguage	9		
0	中文简体							
0	中文繁體							
	Deutsch							
▲ ► ▼ ►	English							\checkmark
0	Français							
	Magyar							
0	Lingua italia	na						
\mathcal{L}	\Diamond	\square	ීම	Ø	þ	Ø	(L)	 .o0o

Figure 11-1 Sample Setting Screen

10.1 Language

Select Language opens a screen that allows you to choose system language. The scan tool is set to display English menus by default.

- To configure system language:
 - 1. Press the **Setting** icon from the Home screen of i70 diagnostic application and select Language. Then all available language options display.
 - 2. Select your local language.

NOTE

The language need our authorization except for default language -English. If you need another language, please contact us for authorization.

10.2 Change Display Mode

Selecting Display Mode opens a screen that allows you to toggle the display mode between full-screen view and display with Android tool bar. The scan tool is set to display with full-screen view by default.We suggest you set Display Mode as Show taskbar.

To configure display mode:

- 1. Press the **Setting** icon from the Home screen of i70 diagnostic application.
- 2. Press **Display Mode** and available modes display.
- 3.Select a display mode.

10.3 Change Units

Selecting Unit opens a dialog box that allows you to choose between British customary or metric units of measure.

- To change the unit setup:
 - 1. Press the Setting icon from the Home screen of i70 diagnostic application.
 - 2. Press Unit and available unit system display.
 - 3.Select a unit system.

10.4 User Information

Selecting User Information option opens a screen to input and manage your workshop information. Your workshop information will be displayed on your test reports that are presented to your customers.

- To input your workshop information:
 - 1. Press the Setting icon from the Home screen of i70 diagnostic application.
 - 2.Select User Information option.
 - 3. Input your workshop name, phone and fax number and email address with the keypad.

10.5 Reset Setting

Selecting Reset Setting option lets you to reset your scan tool to factory defaults. This option will also clear the workshop information.

- ► To reset your scan tool to factory defaults:
 - 1. Press the Setting icon from the Home screen of i70 diagnostic application.
 - 2.Select Reset Setting option.
 - 3. Press the **Reset** button. The scan tool reboots automatically and the reset is completed.

11 About

Selecting **About** option opens a screen that show information about your scan tool, such as serial number and register password which may be required for product registration.

To view information of your scan tool:

1. Press the **About** icon from the Home screen of i70 diagnostic application.

2.A screen with detailed information of the scanner displays.

3. Press the **Back** button to exit.

12 Registration and Update

The scanner can be updated to keep you stay current with the latest development of diagnosis. This section illustrates how to register and update your scan tool. You can register both on Foxwell website or by the update client Foxscanner.

- To update your scanner, please follow the three steps here below:
 - 1.Obtain a FOXWELL ID.

2. Register the product with the product serial number and product password.

3. Update the product by the update application FoxScanner.

To be able to use FoxScanner, PC or laptop must meet the following minimum requirements:

- Operation System: Win98/NT, Win ME, Win2000, Win XP, VISTA and Android 7 and Android 8.
- CPU: Intel PIII or better
- RAM: 64MB or better
- Hard Disk Space: 30MB or better
- Display: 800*600 pixel, 16 byte true color display or better
- Internet Explorer 4.0 or newer

NOTE

Before registration and updating, please make sure your network works correctly.

12.1 Create a Foxwell ID

If you are new to FOXWELL, please register with FOXWELL and obtain a FOXWELL ID first. There are two methods to register an ID.

• Register with the built-in update client Foxscanner on i70

• Register through our website. Please click the URL below: http://www.foxwelltech.com/register/step_two.html

12.1.1 Register with Built-in Update Client FoxScanner

You are allowed to register and create a Foxwell ID with the built-in update client FoxScanner.

To register with FoxScanner:

1. Press the **Update** icon from the Home screen of i70 diagnostic application, and the update client starts up automatically.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

--Increase the separation between the equipment and receiver.

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
