## 二、Initial Setup Instructions

---

### 1. Device Functionality Overview

- a. Long-press the screen on the main interface or in the app menu, tap **【Widgets】**  
Access the settings for **【Face Gallery】** ,  
The watch face comes with three built-in styles that can be freely switched .

- b. Swipe right on the main interface to access the shortcut menu :

 DND MOD	ON : Turn off all device notifications and vibrations
 Step counting <small>Refreshes daily at 00:00</small>	Switching to the step counting allows you to view the daily step count statistics, and the data will be synchronized and updated in the app .
 Timer	Please select minutes and seconds separately for configuration. The device will then countdown to the set time and vibrate as a reminder .
 Stopwatch	Tap the Start button to begin the timer. Pause: Tap the square button. Resume: Tap the triangle button. Clear: Tap the X button."
 Heart rate	After switching to the heart rate testing interface, tap the icon to start the heart rate detection. The data will be synchronized and updated in the app .

(The app will record the most recent 20 detection results)

c. Swipe down of the main interface to access the quick settings menu :

	Pair setting	Please refer to section [III], [Pairing Method for DuoMon] in the user manual
	Wrist Raise	When wearing the device, lifting the arm will automatically wake up the screen
	Brightness	Adjust watch face brightness, with five levels
	Call My Phone	After tapping on the function icon, the phone will have a screen brightness prompt
	Lock Screen	After activation, the screen will be locked on the main page; long-pressing the side button will unlock it
	Regulation	Includes telecommunication certification, NCC logo certification
	Reset	After clicking the confirmation symbol, the device will initiate the reset process
	Shut Down	After clicking, the system will shut down

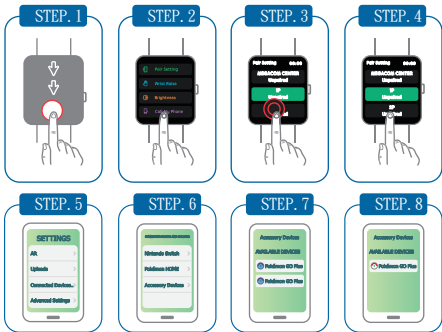

d. Swipe left on the main interface to enter the treasure - catching feature :

	(light up) Pokémon is full		(light up) Bag is full
	(light up) Out of red Poké Balls		(light up) Unknown Pokémon appeared

## 三、Pairing Method for Watchmon

1. Swipe down from the main interface to access Pair Setting
2. Open the game on the phone, go to settings, press and hold **【Watch IP】**, and check the corresponding indicator light
3. After successful pairing, the device serial number will be displayed below IP, allowing identification of the currently connected phone

e. Long-press the screen on the Watchmon main interface to access the shortcut menu :

 Auto Catch	After enabling the feature, it can automatically catch Pokémon.
 Catch Unknown	After enabling the feature, automatically capture unknown Pokémon. After disabling the feature, unknown Pokémon will be retained, and you will be notified.
 Auto Spin	After enabling the feature, it can automatically spin PokéStops.
 Vibration	After enabling the feature, the device's prompts will include vibration.
 Notification	After enabling the feature, the device will provide screen illumination reminders when in standby mode.
<h2>Catch and Spin Statistics</h2>	
 Capture Quantity Statistics, automatically recording the number of Pokémon captured by the device <small>(Refreshes daily at 00:00)</small>	
 PokéStop Quantity Statistics, automatically recording the number of PokéStops spun by the device <small>(Refreshes daily at 00:00)</small>	

swipe up
