Request for Modular/Limited Modular Approval

Date: June 5, 2023						
Subject: Manufacturer's Declaration for ⊠ - Modular Approval □ - Split Modular Company □ - Limited Modular Approval □ - Limited Split			approval			
Cor	Confidentiality Request for:2ASEO-HM-BT4531					
	8 Basic Requirements – FCC Part 15.212(a)(1) For Items Marked "NO(*)", the Limited Module Description Must be Filled Out on the Fo	llowing Page	2			
	Modular Approval Requirement		ment Met			
1.	The modular transmitter must have its own RF shielding. This is intended to ensure that the module does not have to rely upon the shielding provided by the device into which it is installed in order for all modular transmitter emissions to comply with FCC limits. It is also intended to prevent coupling between the RF circuitry of the module and any wires or circuits in the device into which the module is installed. Such coupling may result in non-compliant operation. The physical crystal and tuning capacitors may be located external to the shielded radio elements. 15.212(a)(1)(i)	⊠ - YES	□ - NO(*)			
2.	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with FCC requirements under conditions of excessive data rates or over-modulation. 15.212(a)(1)(ii)	⊠ - YES	□ - NO(*)			
3	The modular transmitter must have its own power supply regulation on the module. This is intended to					
3.	ensure that the module will comply with FCC requirements regardless of the design of the power supplying circuitry in the device into which the module is installed. 15.212(a)(1)(iii)	⊠ - YES	□ - NO(*)			
4.	4. The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b), 15.204(c), 15.212(a), and 2.929(b). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph 15.212(b). 15.212(a)(1)(iv)		□ - NO(*)			
5.	The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing. This is intended to demonstrate that the module is capable of complying with Part 15 emission limits regardless of the device into which it is eventually installed. Unless the transmitter module will be battery powered, it must comply with the AC line conducted requirements found in Section 15.207. AC or DC power lines and data input/output lines connected to the module must not contain ferrites, unless they will be marketed with the module (see Section 15.27(a)). The length of these lines shall be length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified or commercially available (see Section 15.31(i)). 15.212(a)(1)(v)	⊠ - YES	□ - NO(*)

KDB Publicate If using a pern the module is installed must such as the fol XYZMODEL: either provide authorization, requirement. In equipment autility of the modular must be readily installed. If the module is installed wording such a that expresses access the elections installed.	nanently affixed label with its own FCC ID number, if the FCC ID is not visible when installed inside another device, then the outside of the device into which the module is also display a label referring to the enclosed module. This exterior label can use wording lowing: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: 1." Any similar wording that expresses the same meaning may be used. The Grantee may such a label, an example of which must be included in the application for equipment or, must provide adequate instructions along with the module which explain this in the latter case, a copy of these instructions must be included in the application for	⊠ - YES	□ - NO(*)
transmitter, inc of these instru- there are very authorized for operation unde	ransmitter must comply with all specific rule or operating requirements applicable to the cluding all the conditions provided in the integration instructions by the grantee. A copy ctions must be included in the application for equipment authorization. For example, strict operational and timing requirements that must be met before a transmitter is operation under Section 15.231. For instance, data transmission is prohibited, except for ex Section 15.231(e), in which case there are separate field strength level and timing Compliance with these requirements must be assured. 15.212(a)(1)(vii)	⊠ - YES	□ - NO(*)
FCC Rules in 15.253(f) and routine enviror spectrum trans in accordance 15, when nece specific install	ransmitter must comply with any applicable RF exposure requirements. For example, Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform mental evaluation for RF Exposure to demonstrate compliance. In addition, spread mitters operating under Section 15.247 are required to address RF Exposure compliance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part ssary, may also need to address certain RF Exposure concerns, typically by providing ation and operating instructions for users, installers and other interested parties to ensure 5.212(a)(1)(viii)	⊠ - YES	□ - NO(*)

Limited Module Description – When Applicable

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.

Details: <example - N/A>

Software Considerations – KDB 594280 / KDB 442812 (One of the following 2 items must be applied)				
Requirement	Requirement Met			
 For non-Software <u>Defined Radio</u> transmitter modules where software is used to ensure compliance of the device, technical description must be provided about how such control is implemented to ensure prevention of third-party modification; see KDB Publication 594280. 	☐ - Provided in Separate Cover Letter	⊠ - N/A		
 For <u>Software Defined Radio (SDR)</u> devices, transmitter module applications must provide a software security description; see KDB Publication 442812. 	☐ - Provided in Separate Cover Letter	⊠ - N/A		

Split Modular Requirements					
Requirement	Provided in Manual				
 For split modular transmitters, specific descriptions for secure communications between front-end and control sections, including authentication and restrictions on third-party modifications; also, instructions to third-party integrators on how control is maintained. 	☐ - Provided in Separate Cover Letter	⊠ - N/A			

OEM Integration Manual Guidance – KDB 996369 D03 Section 2						
Clear and Specific Instructions Describing the Conditions, Limitations, and Procedures for third-parties to use and/or integrate the module into a host device.
