SmartSYNC™ Family Certification Letter

There are two models of the SmartSYNC™ RFID Module. These models are 141463 and 141466. Both models have identical schematics and printed circuit board layouts for the radio circuit. The differences are that the 141463 has additional circuitry for non-radio functions such as switches and LEDs. The 141463 model is used in host products that require these additional switches and LEDs.

Sincerely,

Patrick Salas
Regulatory Team Leader
