Shenzhen Linklite Smart Lighting Co.,Ltd

product model: KT-A03E

- simulation process of the sun rises, slow lights light up within 30 minutes, with soft, natural sounds easy.
- clear clock display screen, bring comfort to you on time.
- 4 optional wake up alarm clock, easily distinguish between weekdays and weekends.
- 17 audio source, wake up, focus, fit for sleep.
- 3 file can change color temperature, illumination, atmosphere, choose what you need to relax.
- 7 colour light, 4 dynamic light, light a week do not weigh appearance. 180
 minutes can be selected when the shutdown time, the realization of lighting
 and audio source of super long company.
- optional 30 minutes to sleep time, close up your habit.
- fruity and full appearance design, concise and easy, realize lighting lighting biggest benefit
- power automatic memory before the current state, the lights of the last state

1. Electrical parameters::

	The state of the s						
input parameter	Lamp power	audio power	USB Output specifications	Output ripple current	White light dimmer	RGB function	
DC 5V 2.0A	5W	Max 3.5W	NA	No Flicker/±3%	Yes	Yes	
Wireless connection:		Wi-Fi IEEE 802.11 b/g/n 2.4GHz (2412~2462MHz)					
Support system:		Android 4.3 or iOS 7.0 or above					
Lighting standards:		FCC ID——FCC Part15B					
Wireless charging standard		NA					
Adapter input parameters		100-240VAC 50/60HZ 0.3A					
Adapter output parameter		DC5V/2A 10W					
Adapter authentication		CE、FCC、UL					

2. optical parameter

LED type	LEDmodel	LED number	Color rendering index(CRI)	intensity	dominant wavelength	Color temperature	color tolerance
white light	2835 0.5W	2700K: 9PCS 5700K: 9PCS	≥80	350lm±10% (@5700K)	NA	5700K→400K →2700K switchover	< 7@5700K
RGB	5050 0.2W	9PCS	NA		Red light:620-625nm Greenlight:520-525nm blue light:465-470nm	NA	NA

3. defensive function

Shenzhen Linklite Smart Lighting Co.,Ltd

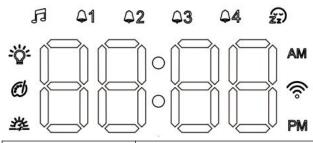

Equipment input OVP	Equipment input UVP	Adapter output SCP	Adapter output OCP
≥6.2Vdc	NA	Hiccup mode,	1.1-1.5 times the output
20.2000	INA	self-recovery	current

4. Key function Description

project	lcon	Manipulation of the way	Function Definition	Remark	
The brightness - key	_	Shortpress /long press	 Dim the lights; Time setting state adjustment time; Switch between color temperature and color light 	Brightness 20; Color temperature 3; Color light monochrome 7 + dynamic light 1	
The key time	\bigcirc	Short press	 Switch to 12/24 hour system; Time setting - minute state switch 		
		Long press	Enter/exit time Settings		
The alarm button		Short press	 Turn on/off all alarm clocks; Alarm clock setting time and alarm clock 	There is no operation when the alarm goes off. It will be closed automatically after 30 minutes of continuous ringing	
		Long press	Enter/exit alarm Settings		
The light key	-`Ď҉-	Short press	 Turn on and off the lights; Switch color temperature mode and RGB mode 		
		Long press	Enter/exit lighting Settings		
The sleep	茶	Short press	Turn on/off sleep mode		
button		Long press5s	Enter WIFI network configuration mode		
Brightness + key	+	Shortpress /long press	 Turn up the lights; Time setting state adjustment time; Switch color temperature and color in light setting state 	Brightness 20 gears	
Snooze button	(Zz)	Short press	 Pause the alarm when it goes off and ring again after 10 minutes (or other snooze time) When the alarm clock does not go off, adjust the brightness of the display screen 	When snoozing, only turn off the sound of the alarm clock, not the light. If the alarm goes off again and there is no operation, it will continue to ring for 30 minutes and then be closed. Display brightness 1-5	
		Long press 3s	Switch machine	Power on and turn on the display, power off the lights & pause the music & Turn off the display

5. The screen shows

Category	lcon	Icon display instructions
Brightness		When the brightness is adjusted, L-XX displays the current brightness level (minimum 1, maximum 20).
Time		When the time is set, the time is flickering
12 hours system	AMPM	AM/PM is always on for 12 hours
The player sleet	Q1Q2Q3Q4	Alarm clock on, icon always on
The alarm clock	₩ ₩ ₩ ₩ ₩ ₩ ₩ ₩ ₩ ₩	The icon flashes when the alarm is set or goes off
		White light on, icon always on
The white light	- "©"-	ICONS flash when the white color temperature is switched
RGB	Eb	RGB on, icon always on
KGB	& <i>D</i>	ICONS flash when RGB color switches
sleep	茶	Turn on sleep mode and keep the icon on
		In the configuration state, the icon flashes
Distribution network	©	The icon will be extinguished if the network is configured successfully or the network is not connected after 3 minutes timeout
To sleep	ŽŽŽ	ICONS flash when you snooze
Music	Я	ICONS always light when music is playing

6. Description of Wi-Fi Wireless Functions (see test file for details)

7. Factory default parameter

1. White light color temperature: 2700K

2. RGB color: blue

3. Light intensity: 50%

4. One-click sleep: timed for 30 minutes, color temperature 2700K, sound source is Ocean

5. Snooze time: 10minutes

FCC Statement

This device complies with Part 15 of the FCC Rules.

Operation issubject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation. 2. Changes or modifications not expressly approved by the partyresponsible for compliance could void the user's authority to operate the equipment.

equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15
of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential
installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in
accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee
that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television
reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one
or more of the following measures:

(1) Reorient or relocate the receiving antenna.

- (1) Reorient or relocate the receiving antenna.
 (2) Increase the separation between the equipment and receiver.
 (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 (4) Consult the dealer or an experienced radio / TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
