Receiver

- 1x Type-A 2.4 GHz Receiver

Tools

- 1x Keycap & Switch Puller
- 1x Screwdriver
- 1x Hex Key

Quick Start Guide

If you are a Windows user, please find the appropriate keycaps in the box, then follow the instructions below to find and replace the following keycaps.

Mac / Windows

1 Connect 2.4 GHz Receiver

Connect the 2.4 GHz receiver to the device USB port.

Switch toggle to 2.4 GHz mode

G = 2.4 GHz

Note: For the best wireless experience, we recommend using the extension adapter for receiver and putting the 2.4 GHz receiver somewhere on your desk close to your keyboard for a low rate of latency and fewer signal interferences.

2 Connect Bluetooth

Switch toggle to Bluetooth

Press fn + 1 (for 4 seconds) and pair with device named Keychron Q1 Max

3 Connect Cable

4 The VIA Key Remapping Software

Please visit usevia.app to use the online VIA software to remap the keys.
If the VIA cannot recognize your keyboard, please reach our support to get the instruction.

* The online VIA software can only run on the latest version of Chrome, Edge, and Opera browsers yet.

* VIA only works when the keyboard is connected by wire to the computer.

5 The Layers

There are four layers of key settings on the keyboard. The layer 0 and layer 1 are for the Mac system. The layer 2 and layer 3 are for the Windows system.

If your system toggle is switched to Mac, then the layer 0 will be activated.

If your system toggle is switched to Windows, then the layer 2 will be activated. Remember that if you are using it in Windows mode, please make changes to the layer 2 instead of the top layer (the layer 0). This is a common mistake people are making.

6 The Backlight

Press fn + Q to change the lighting effect

Press fn + tab to turn the backlight on/off

7 Adjust The Backlight Brightness

Press fn + W to increase the backlight brightness

fn + W

Press fn + S to decrease the backlight brightness

fn + S

8 Adjust The Backlight Speed

Press fn + T to increase the light effect speed

fn + T

Press fn + G to decrease the light effect speed

fn + G
